How to Use this Guide

The Joint Commission’s Survey Activity Guide for Assisted Living Communities is available on your organization’s extranet site.

This guide contains:
- Information to help you prepare for survey
- An abstract of each survey activity that includes logistical needs, session objectives, an overview of the session, and suggested participants
- Sessions are listed in the general order that they are conducted.

A template agenda and a list of survey activities that occur during an onsite visit are posted to your organization’s Joint Commission Connect extranet site in proximity to the time your application is received and reviewed. When the template agenda and survey activity list is available, please download and review the activities and think about the people you might like to have involved. The activity list includes a column in which you can record participant names or positions next to each of the sessions. Identifying key participants (and their phone numbers) for each session, including back-ups, is important. Consider including possible meeting locations and surveyor workspace in your planning documents. Reference the sessions in this Survey Activity Guide and learn more about what you can expect to occur during the activity.

The template agenda and activity list include suggested duration and scheduling guidelines for each of the activities. On the first day of survey, there will be an opportunity for you to collaborate with the surveyor in preparing an agenda for the visit that is considerate of your day-to-day operations.

Please Note: Not all of the activities described in this guide are included in the activity list or on the agenda template. Many of the accreditation program-specific activities are designed to take place during individual tracer activity. The surveyor will incorporate these into the onsite survey when they are applicable to your organization.

Please contact your Account Executive if you have any questions about the onsite survey process.
Preparing for Surveyor Arrival

Overview
An Assisted Living Community will receive a 30-day notice for the initial accreditation survey. On all subsequent surveys the surveyor will arrive unannounced or with short notice. Please consult the Assisted Living Community program accreditation manual, “The Accreditation Process chapter”, “Survey Notification” section, for more information about survey notice. Changes to these accreditation policies and procedures may occur at any time and are published in the Joint Commission monthly newsletter, Perspectives.

Comments received from staff in accredited organizations indicate that a planned approach for the surveyor’s arrival allows them to feel calmer and more synchronized with the survey. This page and the next few pages will help orient your organization staff to the accreditation survey and provide them with preparation guidance.

Preparing for Survey
Prepare a plan for staff to follow when the surveyor arrives. The plan should include:

- Greeting the surveyor: Identify the staff usually at the main entrance of your organization. Tell them about The Joint Commission and educate them about what to do upon the arrival of the surveyor. Explain the importance of verifying any surveyor’s identity by viewing their Joint Commission identification badge. This badge is a picture ID.

- Directions to have the surveyor wait in the lobby until an organization contact person is available.

- Who to notify upon surveyor arrival: Identify leaders and staff who must be notified when the surveyor arrives. Create a list of names, phone numbers, or cell phone numbers. Also, include the individual who will be the surveyor’s “contact person” during the survey. Identify alternate individuals in the event that leaders and staff are unavailable.

- Validation of survey: Identify who will be responsible for the validation of the survey and the identity of the surveyor. Identify the steps to be taken for this process. (See Surveyor Arrival Session for these steps.)

- A working location for the surveyor: The surveyor will need a location that they will call their “base” throughout the survey. This location should have a desk or table, electrical outlet, phone access, and internet access.

- Readiness Guide and Document List: The Guide is created for you to use as a planning tool and can be included with your survey plan. Whether surveyor arrival is announced or unannounced, the first 30 minutes of the surveyor’s day is devoted to brief introductions and planning for your survey activities. Your organization should be prepared to have the items on the Document List available for the surveyor as soon as your organization validates their identity. If this information is not immediately available for the surveyor at the Surveyor Arrival and Preliminary Planning Session, they will begin the survey with an individual tracer.

- Identifying who will serve as escorts for the surveyor.

- Identifying who will assist the surveyor with review of electronic records of care, if applicable to your organization. The surveyor may ask to print some components of the record to facilitate tracer activity and subsequent record review.
• Identifying your organization’s expectations for the on-site survey and who is responsible for sharing these with the surveyor(s).

Note: When a situation is identified that could be a threat to health and safety, surveyors contact the Joint Commission administrative team. The Joint Commission either sends a different surveyor to investigate the issue or the surveyor on site will be assigned to conduct the investigation. Investigations include interviews, observation of care, treatment, and service delivery and document review. Your cooperation is an important part of this process. Surveyors collaborate with the Joint Commission administrative team and outcomes will be communicated to your organization when a determination is reached.

**Note:**

**Survey Planning and Readiness Notes**

Please download this entire Survey Activity Guide and refer to it for details on how to prepare for survey. Everything you need to know about the survey event is provided in this guide.

Refer to the Assisted Living Community Document List on the next page and begin to gather these items together or identify where they are in the organization so that they can be easily located at the start of the survey.

Please review the Assisted Living Community Survey Activity List to assist you in preparing for your survey. The list includes the survey activities that occur on an accreditation survey, including the suggested duration, and suggested timing for these activities. Use this information to begin identifying participants that need to be involved in the survey. The activity list includes a column for your use in recording participant names, possible meeting locations, times that could conflict with participant availability, or any other notes.

Please work with your surveyor to confirm the best day and time for specific survey activities to take place.

Contact your Account Executive with any questions related to this information.
ALC Document List

As an Assisted Living Community, you will need the following information and documents available for the surveyor to review during the Surveyor Arrival and Preliminary Planning and Document Review sessions, which occur on the first day of survey.

- Organization Chart
- Contact person who will assist the surveyor during survey: Name and phone extension
- Map of your organization, if necessary and available
- List of residents and the scope of assistance they are receiving
- Performance Improvement data including your proactive risk assessment
- Infection Control Plan, including risk assessment
- Latest fire safety inspection report from local fire marshal or other authority
- Environment of Care Plan
- Emergency management hazard vulnerability analysis (HVA)
- Emergency Operations Plan and evaluations of exercises and responses to actual emergencies
- Evaluations and results of the organization’s culture of person-centered care

Available policies and procedures that guide the following activities and situations:
- Change in resident’s needs or condition
- Termination of residency and transfers to higher level of care
- Medication administration, assistance, and resident self-administration
- Medication safe handling, overrides of dispensing equipment (if applicable)
- Medication orders (including prn and verbal) and manufacturer’s discontinued or recalled medications
- Nursing care services
- Smoking
- Building security (for elopement and for unauthorized visitors)
- Residents rights and responsibilities
- Restraint use
- Waived testing

Please note that this is not intended to be a comprehensive list of documentation that may be requested during the survey. Surveyors may need to see additional documents throughout the survey to further explore or validate observations or discussions with staff.

Surveyor Arrival

Organization Participants
Suggested participants include organization staff and leaders as identified in the Pre-survey Planning process.

Logistical Needs
Identify a location where surveyors can wait for organization staff to greet them and a location where surveyors can consider as their “base” throughout the survey.

Overview
On day one the surveyor will arrive at approximately 8:45-8:50 a.m. unless business hours, as provided in the application, indicate that your organization opens later. The surveyor will check in at the front desk, identifying themselves as a Joint Commission surveyor.

Surveyor Arrival Activities
• Implement your Readiness Guide as discussed in the Preparing for Surveyor Arrival section
• Notify key organization members as identified in the pre-survey planning session of the surveyor’s arrival
• Validate that the survey is legitimate by accessing your Joint Commission extranet site. A staff member in your organization with a login and password to your Joint Commission extranet website will follow through with this by:
  o Accessing the Joint Commission’s website at www.jointcommission.org
  o Click on “the Joint Commission Connect” logo
  o Enter a login and password
  o If you cannot access the extranet site to validate the survey or surveyors, call your Account Executive
• Your organization’s extranet site contains the following information (posted by 7:30 a.m. on the morning of your survey):
  o Notification of scheduled Joint Commission event authorizing the surveyor’s presence for the unannounced survey
  o Surveyor name(s), picture, and biographical sketch
  o Scheduled survey dates
• If you have not already downloaded a copy of your survey agenda, do so at this time.
• Begin gathering and presenting documents as identified in the Document List. The surveyor(s) will start reviewing this information immediately.
Surveyor Preliminary Planning Session

Organization Participants
Suggested participants include the staff responsible for coordinating The Joint Commission survey and others as needed and identified by surveyors.

Logistical Needs
The suggested duration of this session is approximately 30 minutes. The surveyor needs a workspace they can use as their “base” for the duration of the visit. This area should have a desk or table, telephone, internet access, and access to an electrical outlet, if possible. Provide the surveyor with the name and phone number of a key contact person who will assist them in planning for the survey and their tracer selection.

Objectives
The surveyor will:
- Review organization documents to become acquainted with your organization
- Plan for tracer activity

Overview
After the surveyor arrives and their identification has been verified, the surveyor immediately begins planning for tracer activity by reviewing the documents you provide them. If documents are not available for the surveyor to review during this session, they will proceed to areas where care, treatment, or services are provided and begin individual tracer activity.
Opening Conference

Organization Participants
Suggested participants include members of senior leadership (representing all accredited programs/services). Members of the governing body (in single-owner organizations, this individual may also be the Administrator) are welcome to participate if available. Attendees should be able to address leadership’s responsibilities for planning, resource allocation, management, oversight, performance improvement, and support in carrying out your organization’s mission and strategic objectives. Other attendees may include at least one member of the governing body or organization trustee and leaders of the medical staff, when applicable.

Logistical Needs
The duration of this session is approximately 15 minutes and will immediately transition into the Orientation to Your Organization. If possible, designate a room or space that will hold all participants and will allow for an interactive discussion. Inform the surveyor at this time of any agenda considerations that may affect the activities for the day.

Objectives
The surveyor will:
• Describe the structure of the survey
• Answer questions your organization has about the survey
• Review your organization’s expectations for the survey

Overview
The surveyor introduces him- or herself and describes each component of the survey agenda. He or she will describe the tracer activity they will conduct. It is important for you to discuss and review your organization’s expectations for the on-site survey with the surveyor. Questions about the on-site visit, schedule of activities, availability of documents or people and any other related topics should be raised at this time. The surveyor will also take time to introduce your organization to the Clarification procedures and new SAFER™ reporting process.

Additionally, the surveyor will explain the resident-centered approach to the survey process and the need to interview residents privately.

IMPORTANT
Your organization should ask questions and seek clarification from the surveyor about anything that you do not understand throughout the onsite event. Depending on the question, issue, or concern, the surveyor may suggest addressing them during a Special Issue Resolution session later in the day. It is important for you to request clarification at any time you do not understand the surveyor’s questions, actions, or discussions.
**Orientation to Your Organization**

**Organization Participants**
Suggested participants include the same participants as the Opening Conference. Suggested participants include members of the senior leadership (representing all accredited programs/services). Members of the governing body are welcome to participate if available. Attendees should be able to address leadership’s responsibilities for planning, resource allocation, management, oversight, performance improvement, and support in carrying out your organization’s mission and strategic objectives. Other attendees may include at least one member of the governing body or organization trustee (in single-owner organizations, this individual may also be the Administrator) and leaders of nursing and the medical staff, when applicable.

**Logistical Needs**
The suggested duration of this session is approximately 45 minutes. This session is an interactive discussion and is combined with the Opening Conference. The organization may share information such as brochures, annual reports, or a brief presentation.

**Objective**
The surveyor will learn about your organization through an interactive dialogue to help focus subsequent survey activities.

**Overview**
During this session the surveyor will become acquainted with your organization. They begin to learn how your organization is governed and operated, discuss leaders’ planning priorities, and explore your organization’s performance improvement process.

Governance and operations-related topics for discussion include:
- Organization’s mission, vision, goals, and strategic initiatives
- Organization structure
- Operational management structure
- Assisted Living-based physicians (for example, the Medical Director)
- Information management, especially the format and maintenance of medical records
- Contracted services and performance monitoring
- Health care error reduction and/or resident safety initiatives
- Community involvement
- Leader’s role in emergency management planning
- Organization activities related to risk awareness, detection and response as it relates to cybersecurity
- Culture transformation, initiatives for resident-centered care
- Pain assessment, pain management including non-pharmacologic treatment modalities, and safe opioid prescribing, when applicable

Discussion topics include your:
• Leaders’ ideas of your organization’s potential risk areas
• Leader’s approach to completing the Focused Standards Assessment (FSA) Tool and methods used to address areas needing improvement (resurveys only). More information can be found in The Accreditation Process chapter of the Assisted Living Community accreditation manual.
• Management and leadership’s oversight and other responsibilities

Senior Leadership Role in Improving Performance discussion topics may include:
• How leaders set expectations, plan, assess, and measure initiatives to improve the quality of services
• Organization approach to safety, including selection of Proactive Risk Assessment topics, resulting improvements, and Board/Governance involvement in safety issues
• Provision of personnel and resources including time, information systems, data management, and staff training

Note: Surveyors will request examples of performance improvement initiatives including evidence that performance was achieved and sustained.
Life Safety Code® Building Assessment

Organization Participants
Suggested participants include the individual who manages your organization's facility(ies) and other staff at the discretion of your organization.

Logistical Needs
The suggested duration for this activity is 45 minutes.

The following documentation should be available for surveyor review:
- Latest fire safety inspection report from the local fire marshal or other authority.
- Available plans and drawings that display the layout of the building, including building fire safety features (arrangement of smoke compartments, location of suites, age of building additions, areas with automatic sprinklers, areas under construction).
- Processes for Interim Life Safety Measures (ILSMs).

An escort who has keys or tools necessary to open locked rooms, closets, or compartments to allow the surveyor access.

Objectives
The surveyor will:
- Evaluate the effectiveness of processes for maintaining fire safety equipment and fire safety building features
- Evaluate the effectiveness of processes for identifying and resolving Life Safety Code® problems
- Evaluate the effectiveness of processes for activities developed and implemented to protect occupants during periods when a building does not meet the applicable provisions of the Life Safety Code® or during periods of construction
- Evaluate the effectiveness of processes for maintaining and testing any emergency power systems
- Evaluate the effectiveness of processes for maintaining and testing any medical gas and vacuum systems, if applicable
- Determine the degree of compliance with relevant Life Safety Code® requirements
- Educate attendees on potential actions to take to address any identified Life Safety Code® problems

Facility Orientation
The surveyor will meet with appropriate organization staff to become oriented to the:
- Latest fire safety inspection report from the local fire marshal or other authority
- Layout of the building and building fire safety features
- Organization processes for Interim Life Safety Measures (ILSMs)

Overview of Building Tour
The surveyor will:
• Assess hazardous areas, such as soiled linen rooms, trash collection rooms, and oxygen storage rooms
• Assess required fire separations
• Assess required smoke separations (at least two)
• Verify that fire exits per building and verify that they are continuous from the highest level they serve to the outside of the building
• Assess any kitchen grease producing cooking devices
• Assess the bottoms of any laundry and trash chutes
• Assess the main fire alarm panel (if any)
• Assess the condition of emergency power systems and equipment
• Assess any medical gas and vacuum system components including master signal panels, area alarms, automatic pressure switches, shutoff valves, flexible connectors, and outlets

Documentation of Findings
A Life Safety Code® deficiency will be recorded as a Requirement for Improvement in the Summary of Survey Findings Report.
Environment of Care and Emergency Management

Organization Participants
- Suggested participants include individuals familiar with the management of the environment of care, that is, maintaining a safe, functional, and supportive environment including building space and equipment. Also include individuals responsible for emergency management planning and activities in all areas of your organization. This may include the safety management coordinator, security management coordinator, facility manager, building utility systems manager, housekeeping and environmental services manager, and the person(s) responsible for information technology (IT).

Objective
The surveyor will assess your organization’s degree of compliance with relevant standards and identify vulnerabilities and strengths in your organization’s management of the environment of care and emergency management processes.

Overview
The duration of this session is approximately 60 minutes depending on the type of organization, services provided, and facilities. Activity is divided into two parts: Environment of Care/Emergency Management group discussion and an Environment of Care tracer.

Environment of Care and Emergency Management Discussion (Approximately 70% of session time) – Be prepared to discuss how the various Environment of Care risk categories and construction activities, when applicable, are addressed in each of the following six management processes.

Plan
- What specific risks related to the environment of care have been identified by your organization?

Teach
- How have roles/responsibilities for staff/volunteers been communicated by your organization.

Implement
- What procedures and controls (both human and physical components) does your organization implement to minimize the impact of risk to residents, visitors, and staff?

Respond

1 The environment of care risk categories include: General safety and security, hazardous materials and waste, fire safety, medical/laboratory equipment, and utilities.
• What procedures does your organization implement to respond to an environment of care incident/failure?
• How, when, and to whom are environment of care problems, incidents, and/or failures reported within your organization.

**Monitor**
• How is environment of care performance (both human activities and physical components) monitored by your organization
• What monitoring activities have taken place within the last 12 months (on re-surveys)?

**Improve**
• What environment of care issues are currently being analyzed?
• What actions have been taken as a result of monitoring activities?

The following matrix is provided to assist in determining patterns of management process or risk category areas of concern and strengths.

<table>

If your organization wants to conduct a mock Environment of Care Session:
1. Identify a high-risk process or category
2. Determine the location for that risk or category in your plans, e.g. safety, security etc.
3. Trace the risk or category through the phases in the first column of the matrix: Planning, teaching, implementing, responding, monitoring, and improving
4. Note any gaps between what exists and what should be in place
5. Modify the process, as needed
Be prepared to discuss your organization’s performance addressing the emergency management requirements including:

- Identifying potential emergencies that could affect demand for organization services or the organization’s ability to provide services (sometimes referred to as a Hazard Vulnerability Analysis)
- Risk, detection and response to cyber securities, including leadership support for IT system resilience, and IT representation in or informing emergency management planning and activities
- Determining response strategies and how the Emergency Management Plan supports these strategies
- Identifying your role in relation to the emergency management program of the community, county, or region
- Identifying an “all hazards” command structure that links with the community’s command structure and
- Making any necessary improvements to your emergency management plan based on critiques of emergency management drills

Environment of Care Tracer (Approximately 30% of session time)

The surveyor observes and evaluates your organization’s performance in managing the selected Environment of Care risk. They observe implementation of those management processes determined to be potentially vulnerable or trace a risk(s) in one or more of the environment of care risk categories your organization manages by:

- Beginning where the risk is encountered or first occurs. (i.e., a starting point might be where a safety or security incident occurs, a piece of medical equipment is used, or a hazardous material enters your organization)
- Having staff describe or demonstrate their roles and responsibilities for minimizing the risk, what they are to do if a problem or incident occurs, and how to report the problem or incident
- Assessing any physical controls for minimizing the risk (i.e., equipment, alarms, building features)
- Assessing the emergency management plan for mitigation, preparedness, response, and recovery strategies, actions, and responsibilities for each priority emergency
- Assess the emergency plan for responding to utility system disruptions or failures (e.g., alternative source of utilities, notifying staff, how and when to perform emergency clinical interventions when utility systems fail, and obtaining repair services)
- If equipment, alarms, or building features are present for controlling the risk, reviewing implementation of relevant inspection, testing, or maintenance procedures
- If others in your organization have a role in responding to the problem or incident, having them describe or demonstrate that role, and reviewing the condition of any equipment they use in responding

If the risk moves around in your organization’s facility (i.e., a hazardous material or waste), the surveyor follows the risk.
Individual Tracer Activity

Organization Participants
Suggested participants include staff and management involved in the resident’s care, treatment, and services.

Logistical Needs
The suggested duration of individual tracer activity varies but typically is 90-120 minutes. Care is taken by surveyors to assure confidentiality and privacy and they will seek the help and guidance of staff in this effort. Surveyors may use multiple resident records of care, treatment, or services during an individual tracer. The purpose of using the record is to guide the review, following the care, treatment, or services provided by the organization to the resident.

A surveyor may arrive in a setting/unit/program/service and need to wait for staff to become available. If this happens, the surveyor will use this time to observe the environment of care or observe the care, treatment, or services being rendered.

Objective
The surveyor will evaluate your organization’s compliance with standards as they relate to the care and services provided to residents.

Overview
Most of the survey activity occurs during individual tracers. The term “individual tracer” denotes the survey method used to evaluate your organization’s compliance with standards related to the care, treatment, and services provided to a resident. Most of this survey activity occurs at the point where care, treatment, or services are taking place.

Initially, the selection of individual tracer candidates is based on your organization’s clinical services as reported in your e-application and the general risk areas identified for the accreditation program. On subsequent re-surveys, the surveyor will also consider any organization-specific risk areas listed in the Intracycle Monitoring (ICM) Profile. As the survey progresses, the surveyor may select residents with more complex situations. The surveyor will ask for your assistance in identifying residents for tracer activity that will allow for focus on the scope of services provided by your organization that are addressed in the standards. This includes:

| • Resident receiving assistance with activities of daily living | • Resident receiving multimodal medication assistance and administration |
| • Resident receiving psychotropic medication(s) or other high risk medications | • Resident previously or currently positive for a contagious infection |
| • Resident at risk for or with existing pressure injury | • Resident with dietary or swallow restrictions |
| • Resident with dementia diagnosis | • Resident receiving rehabilitation services |
| • Resident receiving palliative or hospice care | • Resident at risk for falls |
The individual tracer begins in the setting/unit/program/service/location where the resident and their record of care are located. The surveyor starts the tracer by reviewing a record of care with the staff person responsible for the individual’s care, treatment, or services. The surveyor then begins the tracer by:

- Following the course of care, treatment, or services provided to the resident from before acceptance into the community through after they move out
- Assessing the interrelationships between disciplines, departments, programs, services, or units (where applicable), and the important functions in the care, treatment or services provided
- Identifying issues that will lead to further exploration in the system tracers or other survey activities

During the individual tracer, the surveyor observes the following (includes but is not limited to):

- Care, treatment, or services being provided to residents by clinicians, including physicians
- The medication process (e.g., preparation, dispensing, assistance or administration, storage, control of medications)
- Infection control issues (e.g., techniques for hand hygiene, disinfection of surfaces and equipment, food sanitation, and housekeeping)
- The process for planning care, treatment, or services
- The environment as it relates to the safety of residents and staff

During the individual tracer, the surveyor interviews staff about:

- Processes as they relate to the standards
- Intradepartmental and interdepartmental communication for the coordination of care, treatment, or services, for example, hand-offs
- The use of data in the care of residents, and for improving organization performance
- Resident flow through the organization
- Resident education
- Pain assessment, pain management including non-pharmacologic treatment modalities, and safe opioid prescribing initiatives, when applicable; resources available to staff on this topic
- Staff member orientation, education, and competence assessment
- The information systems they use for care, treatment, and services (paper, fully electronic or a combination of the two) and about any procedures they must take to protect the confidentiality and integrity of the health information they collect
  - Back-up procedures they’ve been instructed to use if the primary electronic system is unavailable
  - If internet-connected health information, equipment, or devices are used in care, treatment, or services, staff may be asked to describe their access procedures (passwords, authentication, etc.), confidentiality measures, and instructions on downtime procedures
  - How they approach risk awareness, detection and/or response as it relates to potential cyber emergencies
• Other issues

During the individual tracer, the surveyor may speak with available licensed independent practitioners about:

• Organization processes that support or may be a barrier to resident care, treatment, and services
• Communications and coordination with other licensed independent practitioners (consulting physicians, primary care practitioners, etc.)
• Discharge planning, or other transition-related resources and processes available through the organization
• Awareness of roles and responsibilities related to the environment of care, including prevention of, and response to incidents and reporting of events that occurred
• Pain assessment, pain management including non-pharmacologic treatment modalities, and safe opioid prescribing initiatives, when applicable; Prescription Drug Monitoring Database and criteria for accessing

During the individual tracer, the surveyor interviews residents, and their families about:

• Coordination and timeliness of services provided
• Education
• Perception of care, treatment, or services
• Staff observance of handwashing and verifying their identity
• Understanding of instructions (e.g., diet or movement restrictions, medications, provider follow-up), as applicable
• Rights of residents
• Other issues

Using individual tracers for continuous evaluation

Many organizations find tracer activity helpful in the continuous evaluation of their own services. If you choose to conduct your own individual tracer activity, in addition to clinical services, consider the following criteria in selecting residents:

• Residents with infections and complicated, multi-medication regimens or who are receiving high-risk medications, which allow a focused look at organization systems for infection prevention and control and medication management
• Residents who move between programs, services and settings, for example, residents who transition from independent living to a higher level of service, or residents who transition from assisted living to memory care units.
• New resident
• Residents who recently transferred or moved out
• Resident receiving health services coordination, for example, medication management, skin integrity, other medical services)
• Resident with limited mobility
• Resident who smokes
• Resident with a dementia diagnosis
- Resident on an antipsychotic medication
- Resident residing in the organization’s distinct dementia or memory care unit, if applicable
- Resident receiving supervised assistance with one or more Activities of Daily Living
- Resident who receives or received point of care testing
- Resident receiving rehabilitation therapy
- Resident representative of the organization’s performance on quality indicators, if available
Program Specific Tracer – Staffing

Organization Participants
The surveyor will suggest participants. This may include resident aids or nursing assistants, as applicable; agency staff; non-nursing ancillary staff; administrator; family council members, if available (may be telephonic); and other leaders.

Logistical Needs
This focused tracer occurs during time designated for Individual Tracer Activity. Documents that are requested include staffing plans, staff variance reports, and meeting minutes.

Objectives
The surveyor will:

- Evaluate actions taken by your organization during staff turnover to ensure positive outcomes to resident care
- Identify processes and possibly system issues contributing to negative resident outcomes in light of staff or administrative turnover

Overview
The focus of this session is to identify breaches in continuity of care and explore operational processes in the presence of staff or administrative turnover.

The surveyor conducts individual interviews with staff that includes the following discussions:

- Processes pertaining to the care of residents to prevent negative outcomes
- Barriers to those processes
- Staff’s knowledge of the residents for which they are assigned
- Perception of issues leading to turnover
- Staff communication
- Recruitment and hiring practices
- Orientation and training
- Changes in policy, procedure, vision, expectations

The surveyor also conducts interviews with residents and/or their family members (family interviews can be conducted telephonically) to ask questions about:

- The care received and the perceived barriers to that care
- Communication regarding administrative and staff turnover
- Changes in the provision of care when there is administrative or staff turnover

The surveyor conducts individual interviews with leadership (for example, governing body member, administrator, director of nursing, etc.) to discuss their knowledge regarding:
• Association of negative outcomes with staff issues
• Follow-up actions taken
• Monitoring of actions taken
• Communication of changes in mission, vision, process, etc.
• Methods used to stabilize or prevent turnover
Special Issue Resolution

Organization Participants
None, unless otherwise requested by the surveyor

Logistical Needs
Thirty minutes is scheduled toward the end of each day except the last for surveyors to conduct either Special Issue Resolution or engage in Surveyor Planning activity. The surveyor will inform your organization’s contact person what activity they will be conducting.

The surveyor will inform your organization’s contact person of what documentation, if any, is needed for the Issue Resolution activity if being conducted and any staff who they would like to speak with or locations they want to visit.

Overview
The surveyor explores issues that surfaced throughout the survey that could not be resolved at the time they were identified (staff unavailable for interview, visit to another location required, additional file review required, etc.). Depending on the circumstances, this may include:

- The review of policies and procedures
- The review of additional resident records to validate findings
- Discussions with staff, if necessary
- Review of personnel and credentials files
- Review of data, such as performance improvement results
Surveyor Planning

Organization Participants
None

Logistical Needs
Thirty minutes is scheduled toward the end of each day except the last for surveyors to conduct either Special Issue Resolution or engage in Surveyor Planning activity. The surveyor will inform your organization’s contact person of the activity they will be conducting.

Overview
The surveyor uses this session to review their observations for the day and plan for upcoming survey activities.

Before leaving the organization, the surveyor will return organization documents to the survey coordinator / liaison. If the surveyor has not returned documentation, your organization is encouraged to ask for the documents prior to their leaving.
Daily Briefing

Organization Participants
Suggested participants include representative(s) from governance (if available), CEO/Administrator or Executive Director, individual coordinating the Joint Commission survey, and other staff at the discretion of organization leaders.

Logistical Needs
The suggested duration for this session is approximately 15 to 30 minutes and occurs every morning of a multi-day survey, except for the first day. The surveyor may ask to hold a daily briefing before concluding activity on the first day, depending on circumstances.

Objective
The surveyor will summarize the events of the previous day and communicate observations according to standards areas that may or may not lead to findings.

Overview
The surveyor briefly summarizes the survey activities completed the previous day. During this session the surveyor makes general comments regarding significant issues from the previous day, notes potential non-compliance, and emphasizes performance patterns or trends of concern that could lead to findings of non-compliance. The surveyor will allow you the opportunity to provide information that they may have missed or that they requested during the previous survey day. You may also present the surveyor with information related to corrective actions being implemented for any issues of non-compliance. The surveyor will still record the observations and findings but will include a statement that corrective actions were implemented by the organization during the on-site survey.

Your organization should seek clarification from the surveyor about anything that you do not understand. Note that the surveyor may decide to address your concerns during a Special Issue Resolution Session, later in the day. It is important for you to seek clarification if you do not understand anything that the surveyor discusses.
Leadership and Data Use

Organization Participants
Suggested participants include leaders with responsibility and accountability for design, planning, organizational processes, and data management. Typically, participants include the following:
- At least one member of the governing body or an organization trustee (in single-owner organizations, this individual may also be the Administrator)
- Senior organization leaders (Administrator, COO, CFO, VP for Clinical Services, Director of Nursing Services, Director of Resident Services or Branch Manager)
- Other organization leaders (Director of Human Resources, and Performance Improvement).

Logistical Needs
The suggested duration of this session is approximately 90 minutes.

Objective
The surveyor will explore and evaluate how leaders of the organization oversee the collection and use of data to evaluate the safety and quality of care being provided to residents, where the organization is on its journey to high reliability, and to understand and assess the organization’s performance improvement process.

Overview
During this session, the surveyor will facilitate discussion with staff to understand the organization’s adoption of performance improvement fundamental principles for the following topics:
- Medication monitoring through data including medication errors, adverse events, utilization, pain management and prescribing practices including use of opioids
  - Leadership involvement in pain assessment, pain management
- Infection prevention and control, collection and use of surveillance data
- Risk assessment/management activities National Patient Safety Goals, including monitoring of CDC or WHO hand hygiene compliance
- Monitoring performance of contracted services
- Monitoring staff compliance with employee health screening requirements
- The culture transformation planning process, evaluation of culture transformation efforts, and the quality of person-centered care being provided to residents
Competence Assessment and Credentialing

Organization Participants
Suggested participants include staff responsible for the human resources processes; orientation and education of staff; assessing staff competency; assessing licensed independent practitioner and other credentialed practitioner competency. There should be someone with authority to access information contained in personal and credential files.

Logistical Needs
The suggested duration for this session is 30-60 minutes. To plan for a file review, inform the surveyor of your process for maintaining competency records. The review of files is not the primary focus of this session; however, the surveyor verifies process-related information through documentation in personnel and credential files. The surveyor identifies specific staff, licensed independent practitioners, or other credentialed practitioners whose files they would like to review.

Objectives
The surveyor will want to learn about your organization’s:
- Competence assessment process for staff, licensed independent practitioners, and other credentialed practitioners
- Credentialing process (license verification, background checks)
- Orientation, education, and training processes as they relate to staff, licensed independent practitioners, and other credentialed practitioners encountered during individual tracers

Overview
The surveyor discusses the following topics:
- Internal processes for determining compliance with policies and procedures, applicable law and regulation, and Joint Commission standards
- Methods used to determine staffing adequacy, frequency of measurement, and what has been done with the results
- Performance improvement initiatives related to competency assessment for staff, licensed independent practitioners, and other credentialed practitioners
- Orientation of staff, licensed independent practitioners, and other credentialed practitioners to your organization, job responsibilities, and/or clinical responsibilities
- Experience, education, and abilities assessment
- Ongoing education and training
- Competency assessment, maintenance, and improvement
- Competency assessment process for contracted staff, as applicable
- Process for granting of privileges to licensed independent practitioners
- Other topics and issues discovered during the tracer activity
Surveyor Report Preparation

Organization Participants
None

Logistical Needs
The suggested duration of this session is approximately 60-90 minutes. The surveyor needs a room that includes a conference table, power outlets, telephone, and internet access.

Overview
The surveyor uses this session to compile, analyze, and organize the data collected during the survey into a report reflecting your organization’s compliance with the standards. He or she will provide you with the opportunity to present additional information at the beginning of this session if there are any outstanding surveyor requests or further evidence to present from the last day of survey activity. The surveyor may also ask organization representatives for additional information during this session.
CEO Exit Briefing

Organization Participants
Suggested participants include the Chief Executive Officer (CEO) or Administrator

Logistical Needs
The suggested duration of this session is approximately 10 to 15 minutes, but this time may be extended if additional time is needed to ensure all questions or concerns related to the survey and report are addressed.

Objectives
The surveyor will:
• Review the survey findings as represented in the Summary of Survey Findings Report
• Discuss any concerns about the report with the CEO/Administrator
• Determine if the CEO/Administrator wishes to have an Organization Exit Conference or if the CEO/Administrator prefers to deliver the report privately to your organization

Overview
The surveyor will review the Summary of Survey Findings Report (organized by chapter) with the most senior leader and discuss any patterns or trends in performance. The surveyor will also discuss with the most senior leader if they would like the Summary of Survey Findings Report copied and distributed to staff attending the Organization Exit Conference.
Organization Exit Conference

Organization Participants
Suggested participants include the CEO/Administrator (or designee), senior leaders and staff as identified by the CEO/Administrator or designee.

Logistical Needs
The suggested duration of this session is approximately 20-30 minutes and takes place immediately following the Exit Briefing.

Objectives
The surveyor will:
- Verbally review the Summary of Survey Findings Report, if desired by the CEO/Administrator
- Review identified standards compliance issues

Overview
The surveyor will verify with participants that all documents have been returned to the organization. You are encouraged to question the surveyor about the location of documents if you are unsure.

The surveyor will review the Summary of Survey Findings Report with participants. Discussion will include the SAFER™ matrix, Requirements for Improvement, and any patterns or trends in performance. If follow-up is required in the form of an Evidence of Standard Compliance (ESC) the surveyors explain the ESC submission process.

Note: The surveyor will direct you to information on your extranet site that explains “What Happens after Your Survey.”
### Assisted Living Community Accreditation – Sample Agenda

Note: Times are approximate. Work with the surveyor to adjust the schedule, if necessary.

#### DAY 1
