

Pioneers in Quality On-Demand Webinar Series Expert to Expert 2020 eCQM Annual Updates for the 2021 Reporting Period

This on-demand webinar will offer Continuing Education credit.

January 2021

On-Demand Webinar Series

2020 eCQM Annual Updates

- Stroke Measures
- VTE Measures
- PC-05 Exclusive Breast Milk Feeding
- ED-2 Median Admit Decision Time to ED Departure Time for Admitted Patients

New Measure Review

- The CMS Safe Use of Opioids- Concurrent Prescribing

Visit the eCQI Resource Center: <https://ecqi.healthit.gov/general-ecqm-and-ecqi-education>

On-Demand eCQM Video Shorts

eCQM Basics (2 min/video)

- What is a Value Set?
- What is a QDM Data Element?
- What is a Datatype?
- What is an Attribute?

CQL Basics (11 min)

- CQL Basics (excerpt from 2019 PIQ Expert to Expert Series)

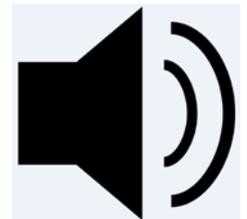

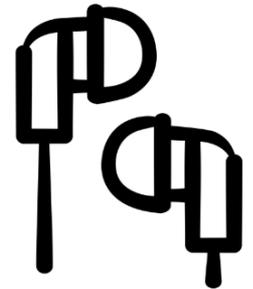

Visit the eCQI Resource Center: <https://ecqi.healthit.gov/general-ecqm-and-ecqi-education>

2020 eCQM Annual Update: **Stroke Measures** **&** **PC-05 Exclusive Breast Milk Feeding**

Webinar Audio – Information & Tips

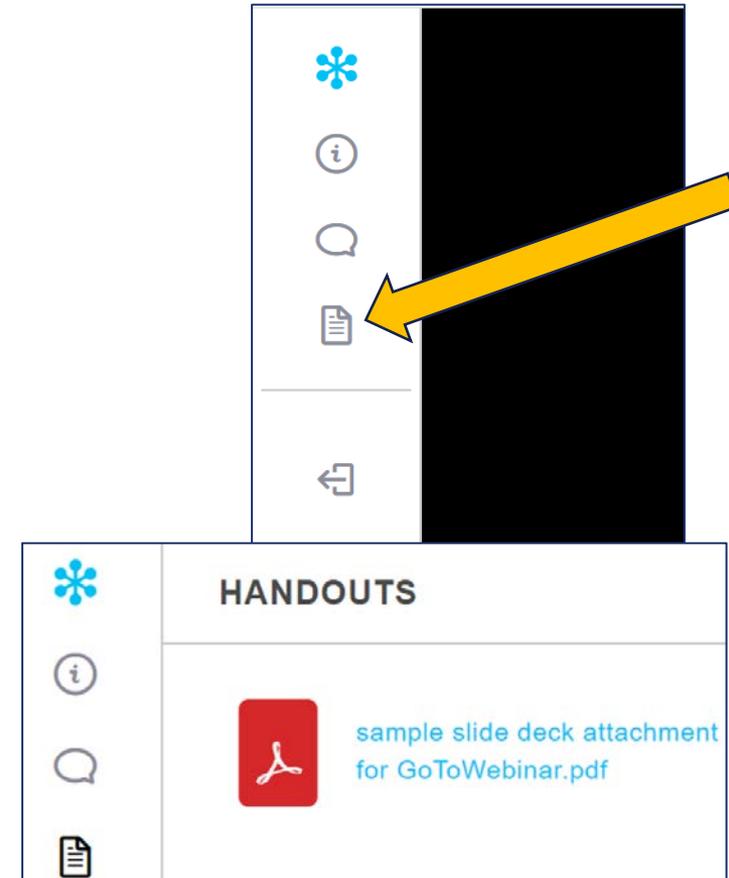

- Use your computer speakers or headphones to listen
 - *closed captioning is available*
- Feedback or dropped audio are common for streaming video. Refresh your screen if this occurs.
- You can pause the play back at any time.

Slides are available now!

To access the slides within the viewing platform:

- click the icon that looks like a document
- select the file name and the document will open in a new window
- you can print or download the slides.

Slides available at:

<https://www.jointcommission.org/measurement/quality-measurement-webinars-and-videos/>

Webinar is approved for 1.0 Continuing Education (CE) Credit for:

- Accreditation Council for Continuing Medical Education (ACCME)
- American Nurses Credentialing Center (ANCC)
- American College of Healthcare Executives (ACHE)
- California Board of Registered Nursing
- International Association for Continuing Education and Training (IACET) (.1 credit)

Continuing Education credits are available for this On Demand webinar for 6 weeks following its release date.

To claim CE credit, you must:

- 1) Have individually registered for this recorded webinar
- 2) Listen to/View the entire recorded webinar
- 3) Complete a post-program evaluation/attestation*

* Program evaluation/attestation survey link will be available after the recording finishes playing.

When you complete the online evaluation survey, after you click *SUBMIT*, you will be redirected to a URL from which you can print or download/save a PDF CE Certificate.

For more information on The Joint Commission's continuing education policies, visit this link <https://www.jointcommission.org/performance-improvement/joint-commission/continuing-education-credit-information/>

**At the end of this webinar, participants
should be able to:**

- 1.** Apply concepts learned about the logic and intent for the STK and PC05 eCQMs,
- 2.** Identify common issues and questions regarding STK and PC05 eCQMs and,
- 3.** Prepare to implement the STK and PC05 measures for the 2021 eCQM reporting period

Disclosure Statement

These staff and speakers have disclosed that neither they nor their spouses/partners have any financial arrangements or affiliations with corporate organizations that either provide educational grants to this program or may be referenced in this activity:

- Susan Funk, MPH, Senior Research Associate, Measurement Coordination and Outreach
- Marc Hallez, RN-MSHI, Associate Project Director, eClinical
- Karen Kolbusz, MBA, BSN, RN, Associate Project Director, DQM
- Mia Nievera, MSN RN, Project Director, eClinical
- Susan Yendro, RN, MSN, Project Director, Clinical
- Yanyan Hu, MS, Associate Project Director, eClinical

Pioneers in Quality On-Demand Webinar

Expert to Expert Series

eCQM Annual Update: Stroke Measures

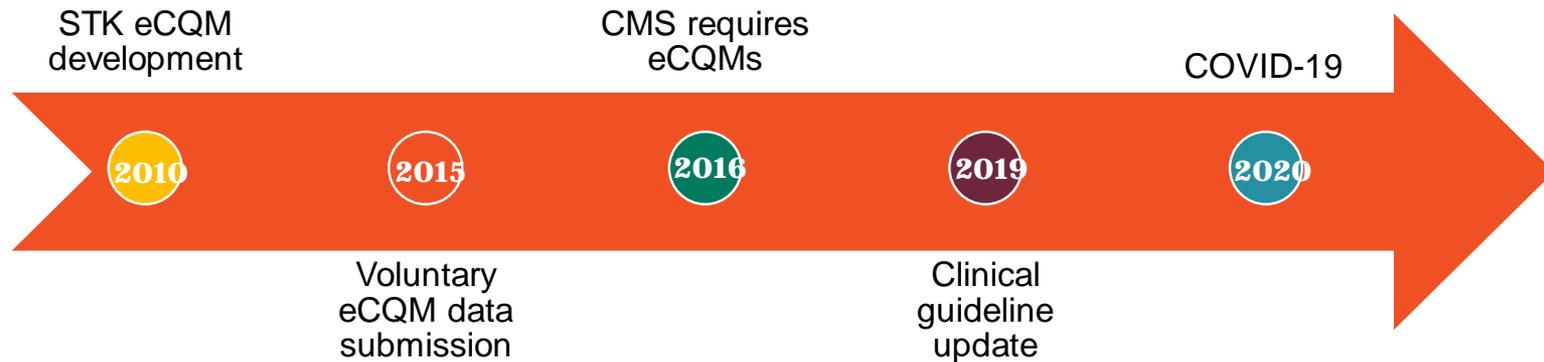

Marc Hallez, MSHI, RN

Karen Kolbusz, MBA, BSN

Mia Nievera, MSN, RN

Stroke Measure Timeline

- eSTK 2 Ischemic stroke patients prescribed antithrombotic therapy at hospital discharge
- eSTK 3 Ischemic stroke patients with atrial fibrillation/flutter prescribed anticoagulation therapy at hospital discharge
- eSTK 5 Ischemic stroke patients administered antithrombotic therapy by end of hospital day 2
- eSTK 6 Ischemic stroke patients prescribed statin medication at hospital discharge

Initial Population- Stroke Measures

Patients age 18 and older discharged from inpatient care (non-elective admissions) with a principal diagnosis of Ischemic or Hemorrhagic Stroke and a length of stay less than or equal to 120 days that ends during the measurement period

Initial Population:

TJC.Encounter with Principal Diagnosis and Age

TJC.Encounter with Principal Diagnosis and Age:

- "All Stroke Encounter" AllStrokeEncounter with ["Patient Characteristic Birthdate": "Birth Date"] BirthDate such that Global."CalendarAgeInYearsAt"(BirthDate.birthDatetime, start of AllStrokeEncounter.relevantPeriod)>= 18

TJC.All Stroke Encounter:

- "Non Elective Inpatient Encounter" NonElectiveEncounter where exists (NonElectiveEncounter.diagnoses Diagnosis where Diagnosis.rank = 1 and (Diagnosis.code in "Hemorrhagic Stroke" or Diagnosis.code in "Ischemic Stroke"))

TJC.Non Elective Inpatient Encounter:

- ["Encounter, Performed": "Non-Elective Inpatient Encounter"] NonElectiveEncounter where Global."LengthInDays"(NonElectiveEncounter.relevantPeriod)<= 120 and NonElectiveEncounter.relevantPeriod ends during "Measurement Period"

Initial Population

Patients age 18 and older discharged from inpatient care (non-elective admissions) with a principal diagnosis of Ischemic or Hemorrhagic Stroke and a length of stay less than or equal to 120 days that ends during the measurement period

Initial Population:

TJC.Encounter with Principal Diagnosis and Age

TJC.Encounter with Principal Diagnosis and Age:

- "All Stroke Encounter" AllStrokeEncounter with ["Patient Characteristic Birthdate": "Birth Date"] BirthDate such that Global."CalendarAgeInYearsAt"(BirthDate.birthDatetime, start of AllStrokeEncounter.relevantPeriod)>= 18

TJC.All Stroke Encounter:

- "Non Elective Inpatient Encounter" NonElectiveEncounter where exists (NonElectiveEncounter.**diagnoses** Diagnosis where Diagnosis.**rank** = 1 and (Diagnosis.code in "Hemorrhagic Stroke" or Diagnosis.**code** in "Ischemic Stroke"))

TJC.Non Elective Inpatient Encounter:

- ["Encounter, Performed": "Non-Elective Inpatient Encounter"] NonElectiveEncounter where Global."LengthInDays"(NonElectiveEncounter.relevantPeriod)<= 120 and NonElectiveEncounter.relevantPeriod ends during "Measurement Period"

STK 5- Antithrombotic Therapy By the End of Hospital Day 2 (CMS72v9)

Denominator

Patients with a principal diagnosis of Ischemic Stroke

Denominator:

TJC."Ischemic Stroke Encounter"

TJC.Ischemic Stroke Encounter:

- "Encounter with Principal Diagnosis and Age" EncounterWithAge
 where exists EncounterWithAge.diagnoses Diagnosis
 where Diagnosis.code in "Ischemic Stroke"
 and Diagnosis.rank = 1
)

TJC.Encounter with Principal Diagnosis and Age:

- "All Stroke Encounter" AllStrokeEncounter with ["Patient Characteristic Birthdate": "Birth date"] BirthDate such that
 Global."CalendarAgeInYearsAt"(BirthDate.birthDatetime, start of AllStrokeEncounter.relevantPeriod)>= 18

TJC.All Stroke Encounter:

- "Non Elective Inpatient Encounter" NonElectiveEncounter where exists (NonElectiveEncounter.diagnoses
 Diagnosis where Diagnosis.rank = 1 and (Diagnosis.code in "Hemorrhagic Stroke" or Diagnosis.code in
 "Ischemic Stroke"))

TJC.Non Elective Inpatient Encounter:

- ["Encounter, Performed": "Non-Elective Inpatient Encounter"] NonElectiveEncounter where
 Global."LengthInDays"(NonElectiveEncounter.relevantPeriod)<= 120 and
 NonElectiveEncounter.relevantPeriod ends during "Measurement Period"

Denominator Exclusions

Inpatient hospitalizations for patients who have a duration of stay less than 2 days

Inpatient hospitalization for patients with comfort measures documented day of or the day after arrival

Inpatient hospitalization for patients with intra-venous or intra-arterial Thrombolytic (t-PA) Therapy administered within 24 hours prior to arrival or anytime during hospitalization

2021 Denominator Exclusions: "Encounter Less Than Two Days"

union "Encounter with Comfort Measures during Hospitalization"

union "Encounter with Thrombolytic Therapy **Given Prior To Arrival Or During Hospitalization**"

2020 Denominator Exclusions: "Encounter Less Than Two Days"

union "Encounter with Thrombolytic Therapy Medication or Procedures"

union "Encounter with Thrombolytic Medication"

union "Encounter with Comfort Measures"

union "Encounter with an INR greater than 3.5"

union "Encounter with Thrombolytic Therapy prior to arrival"

union "Encounter with Thrombolytic Therapy documented as already given"

Denominator Exclusions

Inpatient hospitalizations for patients who have a duration of stay less than 2 days

Inpatient hospitalization for patients with comfort measures documented day of or the day after arrival

Inpatient hospitalization for patients with intra-venous or intra-arterial Thrombolytic (t-PA) Therapy administered within 24 hours prior to arrival or anytime during hospitalization

Denominator Exclusions: "Encounter Less Than Two Days"
 union "Encounter with Comfort Measures during Hospitalization"
 union "Encounter with Thrombolytic Therapy Given Prior To Arrival Or During Hospitalization"

Encounter Less Than Two Days:

- TJC."Ischemic Stroke Encounter" IschemicStrokeEncounter
 where TJC."HospitalizationWithObservationLengthofStay"(IschemicStrokeEncounter)< 2

Denominator Exclusions

Inpatient hospitalizations for patients who have a duration of stay less than 2 days

Inpatient hospitalization for patients with comfort measures documented day of or the day after arrival

Inpatient hospitalization for patients with intra-venous or intra-arterial Thrombolytic (t-PA) Therapy administered within 24 hours prior to arrival or anytime during hospitalization

Denominator Exclusions: "Encounter Less Than Two Days"
 union "Encounter with Comfort Measures during Hospitalization"
 union "Encounter with Thrombolytic Therapy Given Prior To Arrival Or During Hospitalization"

Encounter with Comfort Measures during Hospitalization

TJC."Ischemic Stroke Encounter" IschemicStrokeEncounter
 with TJC."Intervention Comfort Measures" ComfortMeasures
 such that **Coalesce**(start of ComfortMeasures.**relevantPeriod**,
 ComfortMeasures.**authorDatetime**)during
 TJC."CalendarDayOfOrDayAfter" (start of
 Global."HospitalizationWithObservation" (IschemicStrokeEncounter))

TJC.Intervention Comfort Measures:

- ["Intervention, Order": "Comfort Measures"]
 union ["Intervention, Performed": "Comfort Measures"]

Denominator Exclusions

Inpatient hospitalizations for patients who have a duration of stay less than 2 days
Inpatient hospitalization for patients with comfort measures documented day of or the day after arrival

Inpatient hospitalization for patients with intra-venous or intra-arterial Thrombolytic (t-PA) Therapy administered within 24 hours prior to arrival or anytime during hospitalization

Denominator Exclusions: "Encounter Less Than Two Days"

 union "**Encounter With Thrombolytic Therapy Documented As Already Given**"

Encounter With Thrombolytic Therapy Documented As Already Given

TJC."Ischemic Stroke Encounter" IschemicStrokeEncounter
 with [**Diagnosis:** "Intravenous or Intra arterial Thrombolytic (tPA) Therapy Prior to Arrival"] PriorTPA
 such that PriorTPA.authorDatetime during Global."HospitalizationWithObservation" (IschemicStrokeEncounter)

Numerator

Inpatient hospitalization for patients who had antithrombotic therapy administered the day of or day after hospital arrival

Numerator:
"Encounter with Antithrombotic Therapy"

Encounter with Antithrombotic Therapy:

- TJC."Ischemic Stroke Encounter" IschemicStrokeEncounter with ["**Medication, Administered**": "Antithrombotic Therapy"] Antithrombotic such that Antithrombotic.relevantPeriod **starts during TJC."CalendarDayOfOrDayAfter"** (**start of Global."HospitalizationWithObservation"**(IschemicStrokeEncounter)

Denominator Exceptions

Inpatient hospitalization for patients with a documented reason for not administering antithrombotic therapy the day of or day after hospital arrival.

Inpatient hospitalization for patients who receive Ticagrelor or Prasugrel as an antithrombotic therapy the day of or day after hospital arrival.

Inpatient hospitalization for patients with an INR greater than 3.5.

Denominator Exceptions:

"No Antithrombotic Ordered Day Of or Day After Hospital Arrival"

union "Encounter With Pharmacological Contraindications for Antithrombotic Therapy Given Day Of or Day After Hospital Arrival"

union "Encounter With An INR Greater Than 3.5"

No Antithrombotic Ordered Day Of or Day After Hospital Arrival:

- TJC."Ischemic Stroke Encounter" IschemicStrokeEncounter with "No Antithrombotic Ordered" NoAntithrombotic" such that NoAntithrombotic.authorDatetime during TJC."CalendarDayOfOrDayAfter" (start of Global."HospitalizationWithObservation"(IschemicStrokeEncounter))

No Antithrombotic Ordered:

- "No Antithrombotic Ordered for Medical Reason or Patient Refusal" union "No Antithrombotic Administered"

No Antithrombotic Ordered for Medical Reason or Patient Refusal:

- ["**Medication, Not Ordered**": "Antithrombotic Therapy"] NoAntithromboticOrder where NoAntithromboticOrder.**negationRationale** in "**Medical Reason**" or NoAntithromboticOrder.**negationRationale** in "**Patient Refusal**"

No Antithrombotic Administered:

- ["**Medication, Not Administered**": "Antithrombotic Therapy"] NoAntithromboticGiven where NoAntithromboticGiven.**negationRationale** in "**Medical Reason**" or NoAntithromboticGiven.**negationRationale** in "**Patient Refusal**"

Denominator Exceptions

Inpatient hospitalization for patients with a documented reason for not administering antithrombotic therapy the day of or day after hospital arrival.

Inpatient hospitalization for patients who receive Ticagrelor or Prasugrel as an antithrombotic therapy the day of or day after hospital arrival.

Inpatient hospitalization for patients with an INR greater than 3.5.

Denominator Exceptions:

"No Antithrombotic Ordered Day Of or Day After Hospital Arrival"

union "Encounter With Pharmacological Contraindications for Antithrombotic Therapy Given Day Of or Day After Hospital Arrival"

union "Encounter With An INR Greater Than 3.5"

Encounter With Pharmacological Contraindications for Antithrombotic Therapy Given Day Of or Day After Hospital Arrival

TJC."Ischemic Stroke Encounter" IschemicStrokeEncounter

with ["Medication, Administered": "**Pharmacological Contraindications For Antithrombotic Therapy**"]

PharmacologicalContraindications

such that PharmacologicalContraindications.relevantPeriod starts during TJC."**CalendarDayOfOrDayAfter**" (start of Global."**HospitalizationWithObservation**" (IschemicStrokeEncounter))

Denominator Exceptions

Inpatient hospitalization for patients with a documented reason for not administering antithrombotic therapy the day of or day after hospital arrival.

Inpatient hospitalization for patients who receive Ticagrelor or Prasugrel as an antithrombotic therapy the day of or day after hospital arrival.

Inpatient hospitalization for patients with an INR greater than 3.5.

Denominator Exceptions:

"No Antithrombotic Ordered Day Of or Day After Hospital Arrival"

union "Encounter With Pharmacological Contraindications for Antithrombotic Therapy Given Day Of or Day After Hospital Arrival"

union "Encounter With An INR Greater Than 3.5"

Encounter With An INR Greater Than 3.5

TJC."Ischemic Stroke Encounter" IschemicStrokeEncounter

with ["Laboratory Test, Performed": "INR"] INR

such that INR.resultDatetime during TJC."CalendarDayOfOrDayAfter" (start of Global."HospitalizationWithObservation" (IschemicStrokeEncounter))

and INR.result > 3.5

STK-2 Discharged on Antithrombotic Therapy (CMS104v9)

Denominator

Inpatient hospitalizations for patients with a principal diagnosis of Ischemic Stroke

Denominator:

TJC."Ischemic Stroke Encounter"

TJC.Ischemic Stroke Encounter:

- "Encounter with Principal Diagnosis and Age" EncounterWithAge where EncounterWithAge.principalDiagnosis in "Ischemic Stroke"

TJC.Encounter with Principal Diagnosis and Age:

- "All Stroke Encounter" AllStrokeEncounter with ["Patient Characteristic Birthdate": "Birth date"] BirthDate such that Global."CalendarAgeInYearsAt"(BirthDate.birthDatetime, start of AllStrokeEncounter.relevantPeriod)>= 18

TJC.All Stroke Encounter:

- "Non Elective Inpatient Encounter" NonElectiveEncounter where exists (NonElectiveEncounter.diagnoses Diagnosis where Diagnosis.rank = 1 and (Diagnosis.code in "Hemorrhagic Stroke" or Diagnosis.code in "Ischemic Stroke"))

TJC.Non Elective Inpatient Encounter:

- ["Encounter, Performed": "Non-Elective Inpatient Encounter"] NonElectiveEncounter where Global."LengthInDays"(NonElectiveEncounter.relevantPeriod)<= 120 and NonElectiveEncounter.relevantPeriod ends during "Measurement Period"

Denominator Exclusions

Inpatient hospitalizations for patients admitted for elective carotid intervention
Inpatient hospitalizations for patients discharged to another hospital
Inpatient hospitalizations for patients who left against medical advice
Inpatient hospitalizations for patients who expired
Inpatient hospitalizations for patients discharged to home for hospice care
Inpatient hospitalizations for patients discharged to a health care facility for hospice care
Inpatient hospitalizations for patients with comfort measures documented

Denominator Exclusions: TJC."Ischemic Stroke Encounters with Discharge Disposition"
union TJC."Comfort Measures during Hospitalization"

TJC.Ischemic Stroke Encounters with Discharge Disposition:

Question and Answer Segment

Joint Commission Pioneers in Quality eCQM Expert to Expert Webinar eCQM Annual Update

Questions for this segment were obtained from common questions submitted to JIRA and other sources

Question: Why is Enoxaparin 40 mg not in the Antithrombotic Value Set?

Answer: Enoxaparin 40 mg is not a suitable dosage for treating acute stroke. The preferred antithrombotic should be Aspirin.

Question: Why is 100mg/mL included in the Antithrombotic Value Set if 40mg is not an acceptable dose?

Answer: RXNORM code 854255 Enoxaparin sodium 100 MG/ML Injectable is a generalized concept; organizations can map to this code using any dosage. However, the intended use is for therapeutic dosages that exceed 40mg.

Question: For stroke 2, if an antithrombotic medication is prescribed for discharge while the patient is in observation, will it count towards the numerator?

Answer: The logic does not look for a timestamp for when the prescription was written, but rather when the discharge medication list was authored.

Question: Was the clinical trials exclusion removed from the stroke measures?

Answer: No, it is included in the "Medical Reason" value set (2.16.840.1.113883.3.117.1.7.1.473).

Question: Can you review the hospitalization with observation function that includes Emergency Department and Observation encounters?

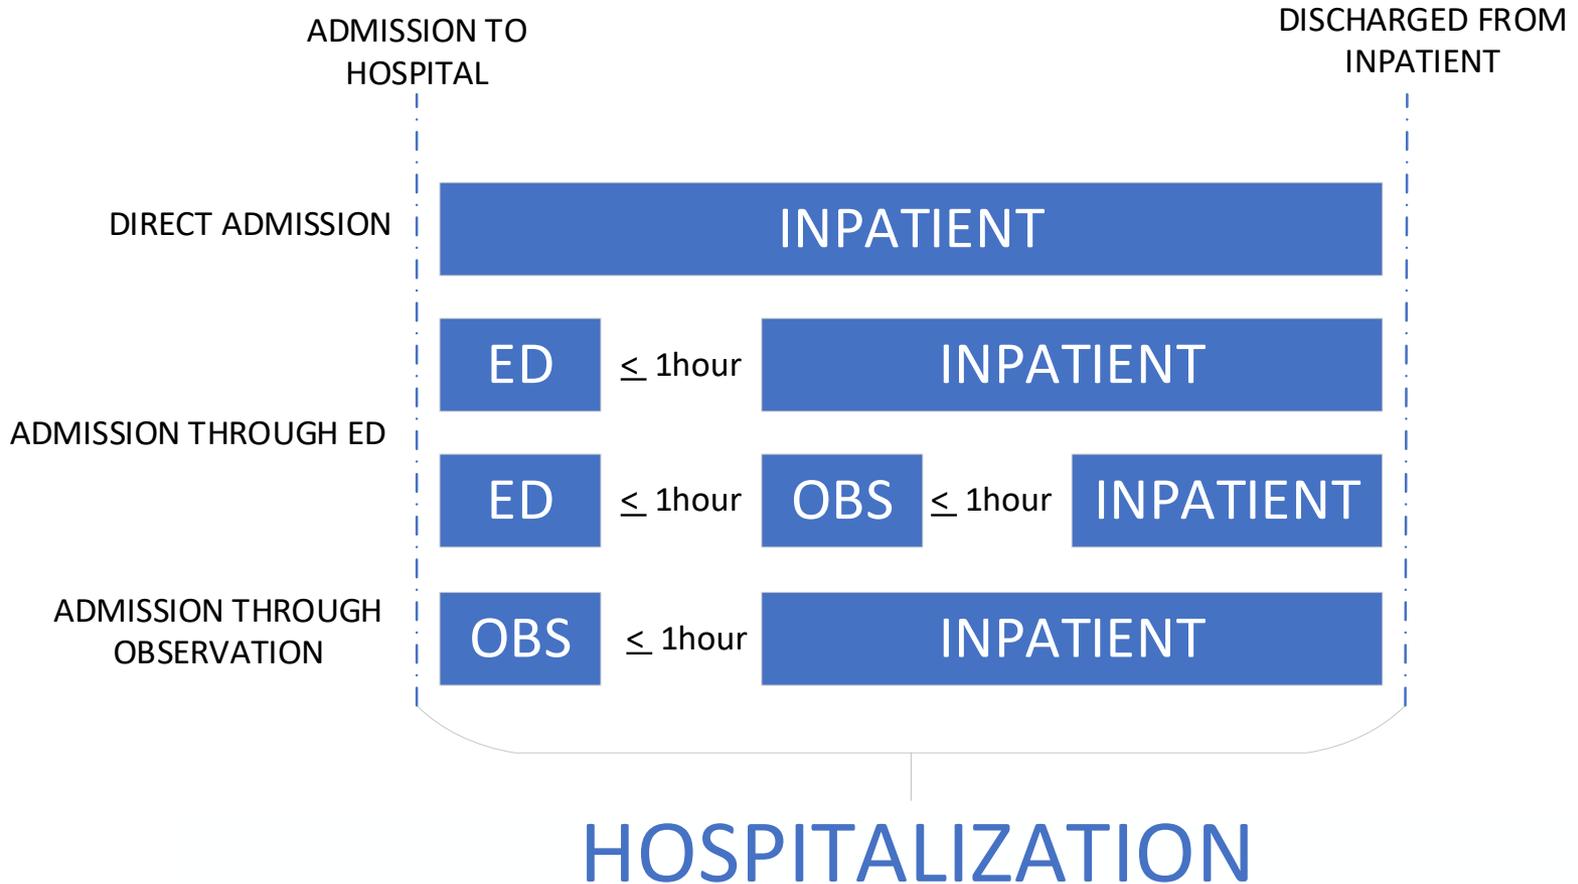

Hospitalization With Observation Function

Global.HospitalizationWithObservation (Encounter “Encounter, Performed”):

- Encounter Visit

```
    let ObsVisit: Last(["Encounter, Performed": "Observation Services"]) LastObs
      where LastObs.relevantPeriod ends 1 hour or less on or before start of
Visit.relevantPeriod
      sort by
      end of relevantPeriod
    ),
VisitStart: Coalesce(Start of ObsVisit.relevantPeriod, start of Visit.relevantPeriod),
EDVisit: Last(["Encounter, Performed": "Emergency Department Visit"]) LastED
      where LastED.relevantPeriod end 1 hour or less on or before VisitStart
      sort by
      end of relevantPeriod
  )
  return Interval[Coalesce(start of EDVisit.relevantPeriod, VisitStart),
  end of Visit.relevantPeriod]
```

Hospitalization with Observation Illustration

**If an ED or OBS visit exists prior to the inpatient encounter, then the time between the end of the visit and the start of the next transition of care must be equal to 1 hour or less.

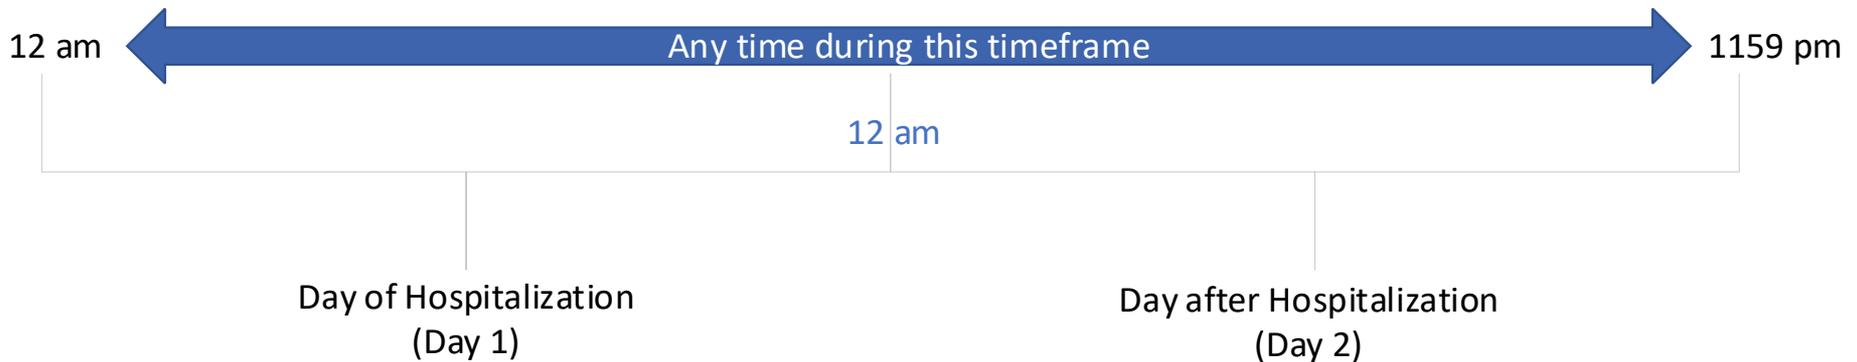

Question: For stroke 5, if a patient was admitted on 7/1 at 9am, what is the cut off for when an antithrombotic medication can be given to pass the Numerator?

Answer: They have until 1159pm on Day 2

eCQM Annual Update:

PC-05 Exclusive Breast Milk Feeding

Yanyan Hu, MS

Susan Yendro MSN, RN

Mia Nievera, MSN, RN

PC-05 Exclusive Breast Milk Feeding

- The intent of the measure is to increase the number of newborns who are exclusively fed breast milk during the birth hospitalization
- Breastfeeding/ human milk is the recommended standard for infant feeding
- There are well-documented short- and long-term medical and developmental advantages of breastfeeding
- Healthy People, CDC and many other organizations actively promote this goal
- Continued opportunity for improvement, the aggregate rate for organizations submitting the eCQM was 58% in 2018
- Measure performance rates of 100% are not expected, available evidence suggests that a 70% threshold may be a more reasonable target for many organizations

Initial Population – PC-05

2021 Initial Population:

Inpatient hospitalizations for single newborns who were born in the hospital that ends during the measurement period, and with either of the following conditions:

- An estimated gestational age at birth of ≥ 37 weeks
- **Birth weight ≥ 3000 grams without an estimated gestational age at birth**

Initial Population: **"Single Live Term Newborn Encounter During Measurement Period"**

2020 Initial Population:

Inpatient hospitalizations for single newborns with an estimated gestational age at birth of ≥ 37 weeks **who are born in the hospital and who did not have a diagnosis of galactosemia, were not subject to parenteral nutrition, and had a length of stay less than or equal to 120 days that ends during the measurement period.**

Initial Population: **"Single Live Birth Encounter With Gestational Age 37 Weeks or More"**

Question and Answer Segment

Joint Commission Pioneers in Quality eCQM Expert to Expert Webinar eCQM Annual Update

Questions for this segment were obtained from common questions submitted to JIRA and other sources

Question: Why did LOS, a diagnosis of Galactosemia, and subject to Parenteral Nutrition move to Denominator Exclusions?

Answer: To have a common Initial Population across the perinatal care newborn measures.

Question: If the newborn is given glucose gel does that count as a feeding?

Answer: Dextrose or glucose 40% gel can be considered a medication not a feeding.

Question: Why were the maternal medical condition exclusions removed?

Answer: This change was made because these conditions are unusual (~2% of patients) and cannot be modeled in the eCQM.

Question: Is a specialty care nursery unit considered a NICU location?

Answer: Per the specifications: Only units that meet the AAP definition: A NICU is defined as a hospital unit providing critical care services which is organized with personnel and equipment to provide continuous life support and comprehensive care for extremely high-risk newborn infants and those with complex and critical illness (source: American Academy of Pediatrics).
