### Standardized Performance Measures for Comprehensive Cardiac Center Certification

**Joint Commission Quality Measures for Disease-Specific Care Certification**

<table>
<thead>
<tr>
<th>Measure ID</th>

</tr>
</thead>
<tbody>
<tr>
<td>CCCIP-01</td>
<td>High-Intensity Statin Prescribed at Discharge</td>
<td>Patients who are hospitalized with a diagnosis of an acute myocardial infarction (AMI) and were prescribed a high-intensity statin at hospital discharge.</td>
</tr>
<tr>
<td>CCCIP-02</td>
<td>Mineralocorticoid Receptor Antagonist Prescribed at Discharge</td>
<td>Patients with a diagnosis of heart failure with a left ventricular ejection fraction (LVSD) ≤40% who were prescribed a mineralocorticoid receptor antagonist at discharge.</td>
</tr>
<tr>
<td>ACHF-01</td>
<td>Beta-Blocker Therapy (i.e. Bisoprolol, Carvedilol, or Sustained Release Metoprolol Succinate) Prescribed for LVSD at Discharge</td>
<td>Beta-blocker therapy (i.e., bisoprolol, carvedilol, or sustained-release metoprolol succinate) is prescribed for heart failure patients with LVSD at discharge. For purposes of this measure, LVSD is defined as chart documentation of a left ventricular ejection fraction (LVEF) less than 40% or a narrative description of left ventricular systolic (LVS) function consistent with moderate or severe systolic dysfunction.</td>
</tr>
<tr>
<td>ACHF-02</td>
<td>Post-Discharge Appointment for Heart Failure Patients</td>
<td>Patients for whom a follow-up appointment for an office or home health visit for management of heart failure was scheduled within 7 days post-discharge and documented including location, date, and time.</td>
</tr>
<tr>
<td>ACHF-06</td>
<td>Post-Discharge Evaluation for Heart Failure Patients</td>
<td>Patients who receive a re-evaluation for symptoms worsening and treatment compliance by a program team member within 72 hours after inpatient discharge.</td>
</tr>
</tbody>
</table>

| CCCIP-03   | Cardiac Rehabilitation Referral from an Inpatient Setting                    | Patients who have had one of the following qualifying events/diagnosis during their current inpatient encounter are to be referred to an outpatient cardiac rehabilitation program. Qualifying events:  
- Diagnosis of a myocardial infarction (MI)  
- Coronary artery bypass graft (CABG) surgery  
- Percutaneous coronary intervention (PCI)  
- Cardiac valve repair/replacement |
<p>| CCCIP-04   | Cardiac Rehabilitation Referral for Heart Failure Patients with Reduced Ejection Fraction from Inpatient Setting | Patients with a diagnosis of heart failure with a reduced ejection fraction (HFrEF) of ≤40% who are referred to outpatient cardiac rehabilitation. |</p>
<table>
<thead>
<tr>
<th>Measure ID</th>
<th>Measure Name</th>
<th>Measure Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CCCIP-05</td>
<td>Cardiac Rehabilitation Enrollment - Inpatient</td>
<td>Patients with one of the qualifying events/diagnoses who attend at least one (1) cardiac rehabilitation session, within 90 calendar days of hospital discharge. Qualifying events: • Diagnosis of a myocardial infarction (MI) • Coronary artery bypass graft (CABG) surgery • Percutaneous coronary intervention (PCI) • Cardiac valve repair/replacement</td>
</tr>
<tr>
<td>CCCOP-01</td>
<td>Cardiac Rehabilitation Referral from an Outpatient Setting</td>
<td>Patients evaluated in an outpatient setting, who have had one of the following qualifying events/diagnosis are to be referred to an outpatient cardiac rehabilitation program. Qualifying events: • Diagnosis of myocardial infarction (MI) • Percutaneous coronary intervention (PCI)</td>
</tr>
<tr>
<td>CCCOP-02</td>
<td>Cardiac Rehabilitation Referral for Heart Failure patients with Reduced Ejection Fraction from an Outpatient Setting</td>
<td>Outpatients with a diagnosis of heart failure with a reduced ejection fraction (HFrEF) of ≤40% who are referred to outpatient cardiac rehabilitation.</td>
</tr>
<tr>
<td>CCCOP-03</td>
<td>Cardiac Rehabilitation Enrollment - Outpatient</td>
<td>Patients with one of the qualifying events/diagnoses who attend at least one (1) cardiac rehabilitation session, within 90 calendar days of an outpatient procedure or office visit. Qualifying events: • Diagnosis of a myocardial infarction (MI) • Percutaneous coronary intervention (PCI)</td>
</tr>
<tr>
<td>ACHFOP-03</td>
<td>Hospital Outpatient Mineralocorticoid Receptor Antagonists Prescribed for LVSD</td>
<td>Patients with a diagnosis of heart failure, a New York Heart Association (NYHA) class II-IV, and heart failure with a left ventricular ejection fraction (LVSD) ≤40% or a narrative description of left ventricular systolic (LVS) function consistent with moderate or severe systolic dysfunction who are prescribed a mineralocorticoid receptor antagonist.</td>
</tr>
<tr>
<td>ACHFOP-06</td>
<td>Hospital Outpatient Discussion of Advance Directives/Advance Care Planning</td>
<td>Outpatients who have documentation in the medical record of a one-time discussion of advance directives/advance care planning with a healthcare provider.</td>
</tr>
</tbody>
</table>

### Optional Outpatient Comprehensive Cardiac Center Certification Performance Measures
