

Current Expert to Expert On-Demand Video Shorts

The Joint Commission, Centers for Medicare & Medicaid Services (CMS), and Mathematica Policy Research developed this series of educational on-demand video shorts about electronic Clinical Quality Measures (eCQMs). Episodes are approximately 2-3 minutes in length (with the exception of the CQL Basics video ~8 minutes) that offer an engaging, succinct, and contemporary approach to teach these complex and comprehensive topics. The eCQM video shorts lead the viewer to understand:

- Application of eCQM resources
- eCQM constructs and
- Logic expression language concepts (CQL, FHIR)

Notes: After clicking the [link to view a recording](#), you will be taken to the event landing page and will be required to enter registration fields before the recording begins.

Clicking the links for the follow-up documents may automatically download the PDF rather than open a new internet browser window.
