

## Current Measure-Specific Webinars

Periodically, Joint Commission will offer webinar sessions regarding new measures and changes to existing measures. These can include eQMs and/or chart-based measures used for both accreditation and certification purposes. As Joint Commission schedules additional webinars, check back for updates to this table. Table will include registration links, and, after each session, a link to the follow-up documents (slides, recording, and Q&A).

*Clicking the links for some of these documents may automatically download the PDF rather than open a new internet browser window.*
