Making Health Care Better: Celebrating the 2019 John M. Eisenberg Patient Safety and Quality Award Winners

Presented by
The Joint Commission &
The National Quality Forum

May 2020
The 2019 John M. Eisenberg Patient Safety and Quality Awards recognize those who have made significant and long-lasting contributions to improving patient safety and health care quality. Established in 2002 by The Joint Commission and the National Quality Forum (NQF), this annual awards program is named after former Agency for Healthcare Research and Quality (AHRQ) Administrator John M. Eisenberg.

“The Eisenberg Awards are an annual reminder that we, as a nation, cannot take health care quality and safety for granted, and significant work remains to ensure that care is safe for every person. The Eisenberg Awards recipients inspire us by demonstrating leadership in action and reminding us the role we each can play in improving quality across the nation.”

Shantanu Agrawal, MD, MPhil, president and chief executive officer, National Quality Forum
The winners of the 2019 Eisenberg Awards are:

Gordon D. Schiff, MD — Individual Achievement

HCA Healthcare — Innovation in Patient Safety and Quality at the National Level

WellSpan Health — Innovation in Patient Safety and Quality at the Local Level

“The Eisenberg Awards were created to honor Dr. Eisenberg’s enduring legacy. Moreover, by showcasing innovative and sustainable solutions to some of health care’s greatest challenges, these awards further the mission of improving patient safety and quality of care. Congratulations to Dr. Gordon D. Schiff, HCA Healthcare, and WellSpan Health for being the winners of the 2019 Eisenberg Awards. Their tireless efforts have led to significant and long-lasting improvements in health care.”

David Baker, MD, MPH, FACP, executive vice president, Division of Health Care Quality Evaluation, The Joint Commission
An impassioned advocate for health care quality improvement, John M. Eisenberg, MD, MBA, was a founding member of NQF’s board of directors and the former AHRQ administrator (1997-2002). Dr. Eisenberg was a leader in health care quality, and he dedicated his life to ensuring care was based on a strong foundation of research and that it considered the patient’s needs and perspectives.

“I believe his lasting impact goes far beyond his extraordinary body of work. I believe his real legacy is the colleagues who he mentored over the years and the impact those relationships have had as his former mentees become mentors themselves and pass on John’s wisdom. His love of the challenge of improving care, efforts to ensure that no one is left behind, and joy in pursuing his passion were infectious. Seeing that passed on to others is his true enduring legacy.”

Gregg S. Meyer, MD, MSc, CPPS, Partners HealthCare, Eisenberg Award Panel Chair
A pioneer in patient safety, Dr. Gordon Schiff is recognized for his relentless and passionate focus on diagnostic error — long before others in his field recognized its importance.

During Dr. Schiff’s groundbreaking and innovative 40-year career, he has authored more than 250 articles and chapters, many of which are regarded as foundational works on medication safety, health informatics safety and diagnostic error. Dr. Schiff also helped conceive the “Diagnostic Error in Medicine” conference series and co-chaired the early international meetings.

Dr. Schiff was an invited expert and reviewer of the National Academy of Medicine Report, “Improving Diagnosis in Healthcare,” and has been breaking new ground on communicating diagnostic uncertainty to patients — one of the report’s recommendations.

For three decades, he led quality and safety projects at John H. Stroger, Jr. Hospital of Cook County — formerly known as Cook County Hospital — serving Chicago’s uninsured and underserved. For the past decade, he has led innovative quality and safety improvement and research projects at the Brigham and Women’s Hospital’s Center for Patient Safety Research and Practice, as well as for Harvard Medical School’s Center for Primary Care.

“It has been a special privilege for me to bring the learning, insights and experience I had at Cook County Hospital — serving Chicago’s poorest and underserved patients — to Harvard. I realize this is the reverse of the usual academic construct. Yet, I learned so much from my patients, the dedicated staff and quality advocates at County about system errors, engagement, compassion, advocacy, humility, and personally connecting with our patients, that I felt I had a lifetime of knowledge and relationships to draw on. Likewise, coming to Boston to work for the past decade with many of my lifelong heroes in quality, safety and health reform has been a privilege for which I am grateful. We have much unfinished work in quality and safety, particularly in improving diagnosis, that I hope this award can spotlight and catalyze.”

Gordon D. Schiff, MD, 2019 Eisenberg Award winner for Individual Achievement
HCA Healthcare was selected as the winner at the National Level for its exceptional efforts and innovation in leveraging data in real-time for early detection and treatment of sepsis to reduce mortality.

Using data science to analyze sepsis development patterns across 164 HCA hospitals, Sepsis Prediction & Optimization of Therapy (SPOT) was developed — an algorithm and workflow for early sepsis detection and treatment. The algorithm continuously monitors data in patient electronic health records and sends alerts to hospital staff and care teams within minutes of signals indicating impending sepsis. This has provided HCA clinicians with computerized clinical decision support to which they can react at the first moment sepsis is signaled.

Leveraging data from millions of hospitalizations, HCA can now use SPOT to detect sepsis six hours earlier than traditional screenings. This is crucial, as mortality risk increases by 4-7% every hour of delayed diagnosis. With the addition of SPOT in 2018, there has been greater improvement overall in sepsis mortality — approximately 23% year over year compared to 2017.

SPOT is the world’s largest continuously operating sepsis surveillance system.

“Being recognized by The Joint Commission and the National Quality Forum with the Eisenberg Award spotlights our commitment to using scale to improve health care and save lives. On the national stage, we hope such recognition highlights a need for national policy to support similar innovation. Much has been written about the burden of EHRs; our clinicians have told us that meaningful decision support, like detecting sepsis they might have missed, is the best reward for bearing that burden. So, we celebrate every colleague across our organization who has contributed to SPOT’s success. In addition to our frontline caregivers, our patients are being supported by engineers, statisticians, programmers, data scientists and more — all of whom meaningfully contribute to saving lives, and some of whom have even had family members saved by SPOT. This award is a validation of our dedication to the mission of HCA Healthcare — above all else, we are committed to the care and improvement of human life.”

Jonathan B. Perlin, MD, PhD, MSHA, MACP, FACMI, president and chief medical officer, HCA Healthcare
WellSpan Health was selected as the winner at the Local Level for its system-wide approach demonstrating an innovative combination of technology and trained medical staff to save lives and engage in early sepsis intervention.

WellSpan Health implemented a remote registered nurse specialty-trained telemonitoring “bunker” as a more efficient and adaptable/replicable care model, providing real-time surveillance for early sepsis identification in patients in most inpatient settings, emergency departments, emergency department waiting rooms and holding areas. This care process model provides continued clinical support for early identification and treatment of sepsis and avoids alert distraction for clinical teams. Using standard work, digital tools and workflow redesign, clinical reliability and improved patient care outcomes have been realized.

Performance data shows that WellSpan Health achieved Top 10 percentiles in sepsis mortality performance at every hospital compared to peers nationally, as well as Top 1 percentile for the largest WellSpan Health hospital. Early identification and screening for possible sepsis patients improved from 67 minutes to 12 minutes. Most importantly, WellSpan Health estimates 227 patient lives were saved in the performance period from April 2018 to March 2019. To date, it has saved more than 350 lives.

“At WellSpan, we are reimagining health care for our patients and our community. We challenge our teams to innovate and think “what if” at every turn, so that we may deliver on our promise of improving health. Our work in sepsis is just one example of how our teams have dedicated themselves to finding a better way, and it’s a reminder of the power of our mission: Working as one to improve health through exceptional care for all, lifelong wellness and healthy communities.”

Steven Delaveris, DO, vice president, Medicine Service Line, WellSpan Health
The 2019 Eisenberg Award Panel

Gregg S. Meyer, MD, MSc, Partners HealthCare — Chair
Marc Bennett, HealthInsight
Carolyn Clancy, MD, Department of Veterans Affairs
Mary Grealy, Healthcare Leadership Council
Lisa Patton, PhD, IBM Watson Health
David M. Shahian, MD, Harvard Medical School
Andrew Wiesenthal, MD, SM, Deloitte Consulting, LLP

“Befitting of Dr. John Eisenberg’s legacy, these awards represent the highest recognition for important work in quality and safety. The awardees have all demonstrated an ability to tackle difficult issues and make a difference in the quality and safety of the care we deliver to our patients and community. Most importantly, it is my hope that these awards not only provide important and well-deserved recognition but also serve as inspiration for others working on quality and safety.”

Gregg S. Meyer, MD, MSc, CPPS, Partners HealthCare, Eisenberg Award Panel Chair
The Joint Commission

Founded in 1951, The Joint Commission seeks to continuously improve health care for the public, in collaboration with other stakeholders, by evaluating health care organizations and inspiring them to excel in providing safe and effective care of the highest quality and value. The Joint Commission accredits and certifies more than 21,000 health care organizations and programs in the United States. An independent, nonprofit organization, The Joint Commission is the nation’s oldest and largest standards-setting and accrediting body in health care. Learn more at www.jointcommission.org.

National Quality Forum

The National Quality Forum (NQF) works with members of the healthcare community to drive measurable health improvements together. NQF is a not-for-profit, membership-based organization that gives all healthcare stakeholders a voice in advancing quality measures and improvement strategies that lead to better outcomes and greater value. Learn more at www.qualityforum.org.
PREVIOUS RECIPIENTS

2018
Individual Achievement
Brent C. James, MD
Innovation in Patient Safety and Quality at the National Level
The Society of Thoracic Surgeons
Innovation in Patient Safety and Quality at the Local Level
BJC HealthCare

2017
Individual Achievement
Thomas H. Gallagher, MD
Innovation in Patient Safety and Quality - National
Children’s Hospitals’ Solutions for Patient Safety
Innovation in Patient Safety and Quality - Local
LifePoint Health’s National Quality Forum (Brentwood, TN)

2016
Individual Achievement
Carolyn M. Clancy, MD
Innovation in Patient Safety and Quality - National
I-PASS Study Group
Innovation in Patient Safety and Quality - Local
Christiana Care Health System (Newark, DE)

2015
Individual Achievement
Pascale Carayon, PhD
Innovation in Patient Safety and Quality - National
Premier, Inc.
Innovation in Patient Safety and Quality - Local
Mayo Clinic-Rochester

2014
Individual Achievement
Mark L. Graber, MD, FACP
Innovation in Patient Safety and Quality - National
American College of Surgeons
Innovation in Patient Safety and Quality - Local
Northshore-LIJ Health System

2013
Individual Achievement
Gail L. Warden
Innovation in Patient Safety and Quality - National
Institute for Clinical Systems Improvement
Minnesota Hospital Association
Stratis Health
Innovation in Patient Safety and Quality - National
