Changes Announced for the Survey/Review Notification Policy (continued)
Continued from page 3

to conduct the event. Certification and Laboratory events will continue to have this information posted on the Joint Commission Connect site the day of survey. Once the notification—which serves as the official notice of the upcoming event—has been posted, an e-mail notification will be sent to the individuals listed as chief executive officer and primary accreditation/certification contact on the organization's extranet. This e-mail will advise that an event has been scheduled and instruct the contact(s) to log in to their Joint Commission Connect site to view the event details. The organization will also receive a separate e-mail by 7:30 a.m. in the organization's local time zone (for organizations within the United States and its territories) on the morning of the event with the same information listed above. Organizations that are eligible for short notice will no longer receive a phone call from a Joint Commission representative notifying them that the event has been scheduled.

* Unannounced Events*—On the day of the unannounced survey/​review, by 7:30 a.m. in the organization’s local time zone (for organizations within the United States and its territories), The Joint Commission will post on the organization’s secure Joint Commission Connect site the letter of introduction, the survey/​review agenda, and the biography and picture of each surveyor/​reviewer assigned to conduct the event. Once the notification—which serves as the official notice of the upcoming event—has been posted, an e-mail notification will be sent to the individuals listed as chief executive officer, primary accreditation/certification contact, and corporate contact (if applicable) on the organization’s extranet. This e-mail will advise that an event has been scheduled for that day and instruct the contact(s) to log in to their Joint Commission Connect site to view the event details.

For more information about when announced events, short-notice events, and unannounced events apply, please refer to “The Accreditation Process” (ACC) chapter or “The Joint Commission Certification Process” (CERT) chapter of your program manual. Questions may be directed to your organization’s assigned Account Executive.

FDA Bans Use of Powdered Gloves

Noncompliance Cited at Joint Commission Standard
LD 04.01.01, EP 2

The US Food and Drug Administration (FDA) recently published a final rule banning the use of powdered gloves.* As stated in the citation summary, “The Food and Drug Administration (FDA or Agency) has determined that Powdered Surgeon’s Gloves, Powdered Patient Examination Gloves, and Absorbable Powder for Lubricating a Surgeon’s Glove present an unreasonable and substantial risk of illness or injury and that the risk cannot be corrected or eliminated by labeling or a change in labeling. Consequently, FDA is banning these devices. This rule is effective on January 18, 2017.”

Further clarification in the final rule indicates that “the ban applies to all powdered surgeon’s gloves and powdered patient examination gloves without reference to the type of material from which they are made. Additionally, the identification of non-powdered surgeon’s gloves and non-powdered patient examination gloves is also being revised to remove reference to material.”

As a result of this FDA ban, The Joint Commission now evaluates organizations to assure that required implementation of non-powdered glove use occurs as part of the routine survey evaluation. Effective January 18, 2017, for all accreditation programs, instances of noncompliance are being cited at Leadership (LD) Standard LD 04.01.01, Element of Performance (EP) 2: The [organization] provides care, treatment, and services in accordance with licensure requirements, laws, and rules and regulations.”

The final rule also provides guidance on the proper disposal of remaining stock of powdered gloves, recommending that “unused supplies at hospitals, outpatient centers, clinics, medical and dental offices, other service delivery points (nursing homes, etc.), and in the possession of end users, will need to be disposed of according to established procedures of the local community’s waste management system.” While it is important for organizations to address and manage the disposal process, The Joint Commission will not evaluate the organization’s disposal process of any remaining stock because this is outside the scope of the Joint Commission survey.
