Acknowledgments

The Joint Commission, Joint Commission Resources, and Joint Commission International are sincerely appreciative of all the individuals and organizations that contributed to the development of this toolkit. Project staff would like to gratefully acknowledge the generous contributions of several groups and persons.

We wish to thank our collaborating organizations for their partnership throughout this project.

We are grateful to the members of the Technical Advisory Panel (TAP), who provided outstanding advice, active participation, and feedback throughout the development of the toolkit. We were privileged to have domestic and internationally recognized experts on the TAP who not only are committed to reducing the risks associated with the use of central venous catheters but also were a pleasure to work with. We also thank the many reviewers who contributed their knowledge and expertise to this toolkit.

Last, but certainly not least, we are grateful to Baxter Healthcare Corporation for supporting the development of the toolkit with a research grant. Although Baxter had no involvement in the design, writing, or evaluation of the toolkit, we truly appreciate Baxter’s important role in making this publication possible.

Technical Advisory Panel

Anucha Apisarnthanarak, MD
Associate Professor, Thammasat University Hospital, Thailand
International Representative, Thailand

Hanan Balkhy, MD, MMed, FAAP, CIC
Director, WHO Collaborating Centre and GCC Centre for Infection Control
Associate Professor and Executive Director, Infection Prevention and Control Department at King Saud Bin Abdulaziz University for Health Sciences, Kingdom of Saudi Arabia
International Representative, Saudi Arabia
