STROKE CERTIFICATION
Achieving excellence beyond accreditation

The Joint Commission
Accreditation is Just the Beginning

For health care accreditation, the experience and knowledge of The Joint Commission is unmatched. Our commitment to excellence is applied with equal passion and rigor to our stroke certification program, as we put the tools, knowledge and guidance in place for you to deliver continuously reliable and excellent care to stroke patient populations.

The Power of a Single Certification Provider

With a suite of certification offerings covering your entire spectrum of services, The Joint Commission provides benefits no a la carte provider can, including:

- Seamless, logistical implementation
- Certification reports tailored to your specific needs
- A unified platform for consistent care delivery
- An efficient, affordable single process

Joint Commission Advanced Certifications for CSC, PSC and ASRH were developed in collaboration with the American Heart Association/American Stroke Association.
What Is Stroke Certification?

Our comprehensive portfolio of stroke certifications meets the customized needs of every type of hospital within your system. Each certification program recognizes an organization’s distinct achievement in delivering evidence-based care.

Certification is your organization’s commitment to continuous performance improvement, providing high-quality patient care and reducing risks. Stroke Certification options are evaluated under the Disease-Specific Care Certification manual and have three main components: standards, clinical practice guidelines, and performance measurement. This structure provides a framework for consistency of care to improve patient outcomes.

Stroke Certification Offerings
The Joint Commission offers three advanced levels of certification for stroke programs for Joint Commission-accredited hospitals:

• **Comprehensive Stroke Center Certification (CSC)**
• **Primary Stroke Center Certification (PSC)**
• **Acute Stroke Ready Hospital Certification (ASRH)**

The Joint Commission also offers a core stroke certification for rehabilitation hospitals.
10 REASONS TO PURSUE STROKE CERTIFICATION

1. Designation for excellence in the care of stroke patients
2. Creates a loyal, cohesive clinical team
3. Assists organizations in establishing a consistent approach to care, reducing variation and the risk of error
4. Demonstrates commitment to a higher standard of clinical service
5. Provides a framework to improve patient outcomes
6. Helps to organize teams across the continuum of care
7. Provides a competitive edge in the marketplace — supports marketing, contracting and reimbursement
8. Enhances the facility’s ability to attract top-level talent
9. Strengthens community confidence in the quality and safety of care, treatment and services
10. Potential to increase patient volumes due to EMS routing protocols

Joint Commission certified organizations report:
- Consistent improvement over time on key measures
- Superior performance across all measures

STROKE CERTIFICATIONS TO MEET THE SPECIFIC NEEDS OF YOUR HEALTH CARE FACILITY

The Joint Commission provides stroke program certification in the following health care settings:

• Academic/Teaching Hospitals
• Community Hospitals
• Critical Access/Rural Hospitals
• Free Standing Emergency Centers

General Eligibility

• Meet the requirements for Disease-Specific Care Certification
• A formal interdisciplinary program structure
• Utilizes evidence-based clinical practice guidelines
• A formal approach to collecting, analyzing and interpreting performance measures
• Serve a minimum of 10 patients prior to an initial certification review

Demonstrating compliance with The Joint Commission’s national standards and performance measurement expectations may help obtain contracts from employers and purchasers concerned with controlling costs and improving productivity.
Stroke Systems of Care Certification Options

- **Comprehensive Stroke Center Certification (CSC)** is the most demanding certification and is designed for those hospitals that have specific abilities to receive and treat the most complex stroke cases.
- **Thrombectomy-Capable Stroke Center (TSC)** will be available in January 2018 and is designed for hospitals providing endovascular procedures.
- **Primary Stroke Center Certification (PSC)** is designed for hospitals providing the critical elements to achieve long-term success in improving outcomes.
- **Acute Stroke Ready Hospital Certification (ASRH)** is for hospitals or emergency centers with a dedicated stroke-focused program.
With the guidance of the Brain Attack Coalition’s Recommendations for the Establishment of Comprehensive Stroke Centers, and in collaboration with the AHA, The Joint Commission developed an Advanced Certification for Comprehensive Stroke Centers; those hospitals that have specific abilities to receive and treat the most complex stroke cases.

The goal of establishing this level of certification is to recognize the significant differences in resources, staff and training that are necessary for the treatment of complex stroke cases. And as EMS routing protocols dictate where patients will be taken, the most complicated cases can be treated at the centers best equipped to provide the specialized care that can lead to better outcomes.

**Comprehensive Stroke Center Certification (CSC)**

**FEATURED CERTIFICATIONS**

Trusted industry leader certifying 65% of all CSCs.
Eligibility

Must be able to demonstrate care for the following patients:

- 20 Subarachnoid hemorrhage by aneurysm per year
- 15 endovascular coiling or surgical clippings per year for aneurysm
- 25 IV thrombolytics eligible patients per year

Key Requirements

- Acute stroke team available 24/7
- Dedicated neurointensive care unit beds for complex stroke patients 24/7
- Comprehensive diagnostic services
- Ability to meet concurrent needs for two complex stroke patients 24/7
- Neurosurgical services available 24/7
- On-site coverage for NICU by neurospecialist
- Participation in patient-centered research that is approved by an Institutional Review Board
- Tracking, monitoring, and reporting of performance measures

For a complete list, please refer to the CSC standards.

Standards & Guidelines

- Uses advanced Disease-Specific Care standards and additional expectations for transitions of care
- Organization chooses and implements clinical practice guidelines
Primary Stroke Center Certification (PSC)

The Joint Commission’s Primary Stroke Center certification recognizes centers that make exceptional efforts to foster better outcomes for stroke care. Achievement of certification signifies that the services you provide have the critical elements to achieve long-term success in improving outcomes. It is the best signal to your community that the quality care you provide is effectively managed to meet the unique and specialized needs of stroke patients.

The Joint Commission’s Primary Stroke Center Certification program was developed in collaboration with the AHA/ASA. It is based on the Brain Attack Coalition’s Recommendations for the Establishment of Primary Stroke Centers.

10 to 1

Joint Commission certified PSCs outnumber the competition 10 to 1.
**Eligibility & Key Requirements**

- Acute stroke team available 24/7
- Neurologist accessible 24/7 via in person or telemedicine
- Designated stroke beds
- Sufficient diagnostic services
- Ability to provide IV thrombolytics
- Tracking, monitoring, and reporting of performance measures

**Standards & Guidelines**

- Uses advanced Disease-Specific Care standards and additional expectations for transitions of care
- Organization chooses and implements clinical practice guidelines
FEATURED CERTIFICATIONS

Acute Stroke Ready Hospital Certification (ASRH)

Acute Stroke Ready Hospital Certification was developed in collaboration with the AHA and is based on the Brain Attack Coalition’s Recommendations for the Establishment of Acute Stroke Ready Hospitals. Acute Stroke Ready Hospital certification fulfills a community need within a stroke system of care.

Eligibility & Key Requirements

• Acute stroke team available 24/7
• Neurologist accessible 24/7 via in person or telemedicine
• Diagnostic services
• Telemedicine within 20 minutes of it being necessary
• Ability to provide IV thrombolytics
• Tracking, monitoring, and reporting of performance measures

Standards & Guidelines

• Uses advanced Disease-Specific Care standards and additional expectations for transition of care
• Organization chooses and implements clinical practice guidelines

The Joint Commission certifies 10 times the number of ASRHs as the competition
CORE CERTIFICATION

Stroke Rehabilitation

Our core certifications help create a baseline of consistent excellence upon which you can build a care delivery framework to positively impact patient outcomes. These foundational programs encompass three main components—standards, clinical practice guidelines, and performance measurement.

Stroke Rehabilitation Certification is a foundational Disease-Specific Care Certification and must meet core standards under the Disease-Specific Care Certification manual.

Eligibility & Requirements

To be eligible for core certifications, programs must:

• Be located in the United States, operated by the U.S. government, or operated under a charter of the U.S. Congress
• Be provided within a Joint Commission–accredited organization when the organization is eligible for accreditation
• Have served a minimum of 10 patients at the time it submits its application
• Use a standardized method of delivering clinical care based on clinical practice guidelines and/or evidence-based practice
• Use performance measurement to improve its performance over time.
WORKING WITH THE JOINT COMMISSION

Subject Matter Experts

Our reviewers are clinical experts with decades of experience caring for stroke patients across every type of hospital setting.

No Surprises

Just like your Joint Commission accreditation survey, you will be fully aware of the process, know what’s required, and have the agenda ahead of time. Reviewers will make the review process as transparent as possible and collaborate with you and your team throughout the on-site event in an attempt to avoid any surprises at the end of the review. Collaboration, engagement and sharing of best practices allows you and your team to continually improve your stroke program.

Have Questions?

- For information about any of these certifications contact us at 630-792-5291 or email us at certification@jointcommission.org.
- For questions about the standards contact our Standards Interpretation Group (SIG) at 630-792-5900.

“As an organization committed to continuous quality improvement, achieving certification gives us a tremendous opportunity to keep pushing ourselves to do better for our patients as The Joint Commission representatives share ideas and resources to help us improve, actually assisting the organization and creating a higher quality program.”

Jenevra Foley, Operations Director Comprehensive Stroke Center Michigan Medicine
Benefits of Working with The Joint Commission Enterprise

Joint Commission certification can help you elevate your ability to deliver the level of care and safety your patients deserve. To help you prepare for success during the certification process—and to address quality issues beyond—we provide you with a host of trusted, expert resources.

To further advance knowledge and expertise across your spectrum of services, our not-for-profit affiliate, Joint Commission Resources (JCR), provides an extensive offering designed to keep you and your staff on the cutting edge of stroke excellence, including:

- Annual Stroke Certification Conference
- Books, Manuals & Publications
- Innovative Software Solutions
