Now Available for Accredited Hospitals: An Online Exchange of Peer Solutions on Core Measures

Core Measure Solution Exchange

This new tool, an exclusive benefit for hospitals accredited by The Joint Commission, is now available to help foster the sharing of success stories between accredited hospitals.

Hospitals that have dramatically improved and sustained their performance have been asked to contribute to the Solution Exchange so that the community of accredited hospitals can learn from each other by exchanging information to help improve their performance – especially on accountability measures. Through this network, hospitals will be able to learn how their peers have attained and sustained their high measure rates.

The Solution Exchange is easily located on your organization’s Joint Commission Connect extranet site at: http://solutionexchange.jointcommission.org (you will need a Joint Commission Connect login and password).

What you can do with the Exchange:

- Search for solutions to improve core measure performance
- Post comments and participate in discussions about the solutions
- Rate the usefulness and transferability of the solutions
- Post adapted versions of the solutions based upon your own experience
- Be notified via e-mail when new core measure solutions are posted
