Advanced Cardiac Certification

Getting to the heart of the matter
Accreditation is just the beginning.
When it comes to accreditation, no organization can match The Joint Commission’s experience and knowledge. This legacy of excellence and robust expertise is applied with equal passion and rigor to cardiac certification programs, providing the tools, knowledge and guidance you need to deliver continuously reliable and excellent care to high-risk cardiac patient populations.

The Power of a Single Certification Provider

With a suite of certification offerings covering your entire spectrum of services, The Joint Commission provides benefits no a la carte provider can, including:

- Avoiding costly and inefficient disparate processes
- Creating seamless logistical implementation
- Tailoring certification efforts to your specific needs
- Establishing a unified platform for consistent care delivery

Certification Development

Joint Commission Advanced Cardiac Certifications are offered in collaboration with the American Heart Association.
Elevating Cardiac Care Across the Continuum

The Choice is Yours

Only The Joint Commission has developed a wide array of programs, offered in collaboration with the American Heart Association, across every touch point in the cardiac care continuum to help you create and sustain a truly patient-centric quality framework.

**Comprehensive Cardiac Center Certification**

Our newest program provides system-wide reviews and recommendations to help lift your entire organization from excellent to elite.

**Advanced Heart Attack Portfolio of Certifications**

These certifications will standardize and improve coordinated systems of care for multidisciplinary STEMI heart attack care.

**Advanced Heart Failure Certification**

Go beyond excellence with this program to help your inpatient, and if applicable outpatient heart failure program provide high quality care.

Value of Certification

Once certified you have access to an online community, education, resources, quality improvement consultants, a marketing toolkit, and the opportunity to participate in an advisory group. Plus The Joint Commission and the American Heart Association actively advocate to help set public policy.

National standards.

Demonstrating compliance with The Joint Commission’s national standards and performance measurement expectations may help obtain contracts from employers and purchasers concerned with controlling costs and improving productivity.
Get on Track for Achieving Certification

Benefits to your organization and patients from this innovative certification.

- **Reduce** unwanted variations in care and improve the patient experience
- **Improve** efficiency and outcomes at a potential lower cost
- **Align** communication and collaboration among all disciplines
- **Position** your service line to effectively face new challenges
- **Promote** a culture of excellence to boost retention and recruitment of talent
Comprehensive Cardiac Center (CCC) Certification

Deliver superior quality of care across the cardiac continuum

CCC certification is a voluntary program for hospitals with robust cardiac care services seeking to evaluate, evolve and elevate patient care across an extensive array of cardiac domains. Developed in partnership with a technical advisory panel of clinicians with specific expertise in the field, and with input from the American Heart Association, this program is designed to recognize hospitals demonstrating consistent, comprehensive excellence.

CCC certification touches every point in your continuum of care, so that you can provide world-class patient-centric service.

Achieving CCC Certification will help your organization provide the following:

– Integrated, coordinated care
– Care, treatment and services required by a certified comprehensive cardiac center
– Early identification of high-risk patients and management of patient conditions and risks at a level corresponding to the center’s capabilities
– Patient education and information to help them make informed decisions about their care

– Direct care for high-risk problems and stabilization and safe transfer of patients who require care beyond the organization’s scope
– Ongoing quality improvement processes, including center-specific requirements, Joint Commission required measures and participation in nationally audited data registries
Eligibility & Requirements
Your organization is eligible to earn CCC if you:
- Meet eligibility requirements outlined in the standards manual
- Have an established inpatient cardiac care program providing the services outlined below

Standards & Guidelines
- Uses advanced standards and additional expectations for transition of care
- Organization chooses and implements clinical practice guidelines and selects performance measures
Heart Attack Center Certifications

Learn How Primary Heart Attack Center and Acute Heart Attack Ready Certifications can help improve your program

These new Advanced Disease-Specific Care certification programs are for ST-elevation myocardial infarction (STEMI) heart attack patient care. The certifications focus on symptom onset and first medical contact (prehospital and upon hospital arrival), emergency medical services, the emergency department, as well as catheterization laboratories and inpatient settings.

Value of Certification

These programs, offered in collaboration with the American Heart Association, will help you standardize and improve coordinated systems of care across settings regarding identification, assessment, monitoring, management, data sharing, and performance improvement for multidisciplinary STEMI heart attack care.
Eligibility & Requirements

- Meet eligibility requirements outlined in the Comprehensive Certification Manual for Disease-Specific Care Including Advanced Programs for Disease-Specific Care
- Primary Heart Attack Centers must provide on-site primary percutaneous coronary intervention (PCI) coverage for STEMI patients 24 hours a day, 7 days a week
- Acute Heart Attack Ready centers do not provide on-site primary PCI coverage 24 hours a day, 7 days a week, or at all

Standards & Guidelines

- Uses advanced Disease-Specific Care standards and additional expectations for transition of care
- Organization chooses and implements clinical practice guidelines
- Organization must track performance measures
- Organization must participate in the American Heart Association’s Get With the Guidelines® - Coronary Artery Disease registry
Advanced Heart Failure Certification

Elevate your ability to deliver best-in-class service and care with Advanced Certification in Heart Failure (ACHF).

Meet the standards, choose and implement clinical practice guidelines and measure against standardized performance measures which provide for assessment, monitoring, management and performance improvement for heart failure care.

There is a special focus on the inpatient setting and a thorough assessment of care, including transition to outpatient heart failure care providers. This certification is offered in collaboration with the American Heart Association.
Eligibility & Requirements

Your organization is eligible to earn the ACHF if you:

– Meet eligibility requirements outlined in the Comprehensive Certification Manual for Disease-Specific Care Including Advanced Programs for Disease-Specific Care

– Have an established inpatient heart failure clinical treatment program

– Provide ambulatory care services through a hospital-based and hospital-owned heart failure clinic OR a collaborative relationship with one or more cardiology practices

Standards & Guidelines

– Uses advanced Disease-Specific Care standards and additional expectations for transition of care

– Organization chooses and implements heart failure clinical practice guidelines

– Organization must track performance measures

– Organization must participate in the Get With The Guidelines® Heart Failure registry
