SAFER™ will help your organization to:

– More easily identify RFIs with higher risk
– Identify potential for widespread quality initiatives
– Better organize survey findings by level of potential patient impact
– Have one, comprehensive visual representation of survey findings

SAFER™ Impacts

– SAFER™ Matrix will be included in all survey reports and will drive the level of post survey follow up required.
– All RFIs will be addressed in a 60 day Evidence of Standards Compliance Report
– For higher risk level RFIs, additional detail is required regarding corrective action sustainment.
– RFIs of a higher risk level will be highlighted

To discuss the Survey Analysis for Evaluating Risk™ process, contact your account executive.
