The practice reports any changes in the information provided in the application for accreditation and any changes made between surveys.

**Element(s) of Performance for APR.01.03.01**

1. The practice notifies The Joint Commission in writing within 30 days of a change in ownership, control, location, capacity, or services offered.
   Note: When the practice changes ownership, control, location, capacity, or services offered, it may be necessary for The Joint Commission to survey the practice again. If the practice does not provide written notification to The Joint Commission within 30 days of these changes, the practice could lose its accreditation.

**APR.06.01.01**

Applicants and accredited practices do not use Joint Commission employees to provide accreditation-related consulting services.

**Element(s) of Performance for APR.06.01.01**

Key: D indicates that documentation is required; R indicates an identified risk area.
1. The practice does not use Joint Commission employees to provide any accreditation-related consulting services.

   Note: Consulting services include, but are not limited to, the following:
   - Helping the practice to meet Joint Commission standards
